ACKNOWLEDGMENTS	xi
INTRODUCTION	xiii
CHAPTER 1 The Structure of DNA and the Variability of the Human DNA Sequence.....	1
You Are Out of Your Field, But Not Out of Your Depth	1
Markers, Alleles, Genotypes and Profiles.....	2
The Two Sources of DNA in Human Cells.....	5
The Structure of DNA and RNA	6
Variability Is the Rule, Not the Exception	11
Polymorphisms Commonly Used for Forensic Testing	15
Using the DNA Profile to Identify an Unknown Perpetrator	24
References and Additional Readings	25
CHAPTER 2 The Molecular Biological Basis of Forensic DNA Tests: ...	27
Extraction and Quantification of DNA	27
Polymerase Chain Reaction (PCR)-Based Tests	32
Variable Number of Tandem Repeats (VNTR) Testing.....	50
Direct Sequencing	51
References and Additional Readings	53
CHAPTER 3 Quality Control, Quality Assurance and Sources of Uncertainty in the Data.....	55
Laboratory Accreditation, Personnel Certification and Proficiency Testing	55
Validation Studies.....	59
The Inevitable Nemeses: Suboptimal Samples and Human Error.....	61
Allele Dropout Due to Degradation, Preferential Amplification and Stochastic Effects.....	70
Artifacts Inherent in STR Analyses.....	75
Hybridization Specificity in Dot-Blot Tests.....	87
References and Additional Readings	88

CHAPTER 4	Population Genetics, Probability Calculations and the Proper Interpretation of the Evidence	91
	The Common Logical Fallacies	91
	Databases and Databases	99
	Allele Frequencies, Genotype Probabilities and the Product Rule for Independent Events	106
	The Principles of Population Genetics that Impact Forensic DNA Calculations	113
	Applying the Product Rule—Compensating for Population Substructure and Possible Allele Dropout	119
	The Likelihood Ratio (LR) Allows the Analyst to Compare the Strength of Competing Hypotheses	135
	The Application of Bayes' Theorem to Paternity Disputes	142
	Recommended Procedure for Analyzing Mixed Samples	147
	References and Additional Readings	167
CHAPTER 5	Mitochondrial DNA (mtDNA) Analyses	171
	The mtDNA Molecule—Abundant and Durable but Less Variable than nDNA	171
	Laboratory Analysis of mtDNA Haplotypes	174
	Matrilineal Inheritance and a Lack of Recombination	178
	A High Mutation Rate Leads to Mitochondrial Heteroplasmy	180
	Statistical Analysis of mtDNA Haplotype Data	187
	References and Additional Readings	193
CHAPTER 6	Y Chromosome Analyses	197
	Y Chromosome Evolution and its Consequences for Forensic Analyses	197
	Laboratory Analysis of Y Chromosome Haplotypes	204
	Statistical Analysis of Y Chromosome Haplotypes	207
	References and Additional Readings	212
CHAPTER 7	DNA in Court	215
	The Evolution of Standards for Admissibility of Experts and Evidence	215
	The Ongoing Controversy Regarding Laboratory Error Rates	225
	Counsel's Obligations Regarding Discovery	228
	Expert Witnesses	232
	The Durability of DNA Presents Problems for Statutes of Limitation	237
	Rape Shield Laws May Limit the Use of DNA Evidence	238

	Judges' and Jurors' Perceptions of DNA Evidence.....	239
	References and Additional Readings.....	253
CHAPTER 8	Arguing for the Prosecution.....	255
	Obtaining DNA Samples.....	255
	DNA in the Courtroom: The Essentials of the Prosecution's Presentation.....	279
	References and Additional Readings.....	312
CHAPTER 9	Arguing for the Defense.....	313
	The Defense's Choice of Strategy.....	313
	Elements of a Competent Defense.....	326
	When the Defendant Has Been Identified by a Databank Search.....	362
	References and Additional Readings.....	367
CHAPTER 10	Postconviction DNA Testing.....	369
	DNA has the Power to Exonerate the Innocent.....	369
	Avenues for Relief.....	370
	There Are Many Procedural Obstacles.....	373
	New Evidence May Justify a New Theory of the Case.....	379
	Accessing the Necessary Samples.....	380
	Know the Specific Provisions of the Controlling Statute.....	383
	References and Additional Readings.....	386
APPENDIX I:	Using the Chi-Square Test to Determine if a Population Conforms to HWE Expectations.....	389
APPENDIX II:	How the RMP, Prior Odds of Guilt, and the PFP Influence the Posterior Odds of Guilt (POG).....	393
APPENDIX III:	Paternity Index (PI) Calculations for Different Combinations of Maternal, Child and Alleged Father Genotypes.....	397
APPENDIX IV:	A Sample Consent Form to Collect an Oral Swab, Which Allows the Profile Obtained to Be Entered into a Databank for Use in Additional Investigations.....	399
APPENDIX V:	Doing Your Own Research: Useful References, Websites and Strategies for Finding Current Information.....	401
GLOSSARY OF KEY TERMS		411
