Botanical variability and mechanical function of lignins: Two critical aspects of the plant phenolic secondary metabolism	1
<i>Bernard Monties</i>	
The role of plant phenolics in the postharvest physiology and quality of fruit and vegetables	49
<i>Vincenzo Lattanzio</i>	
Distribution of flavonoid aglycones in tribe <i>Anthemideae</i> (Asteraceae)	85
<i>Stephanie Ivancheva and Reneta Tsvetkova</i>	
The different folds adopted by plant cysteine endopeptidases belonging to papain family	97
<i>Géraldine Dehon, Anouar El Moussaoui, René Wintjens</i> <i>Delphine Van Wuytswinkel Mohamed Azarkan and Yvan Looze</i>	
Halogenated natural products in streptomycetes	109
<i>Řezanka, T., Jáchymová, J. and Spižek, J.</i>	
Biosynthesis of plant steroid glycosides	185
<i>Zdzisław A. Wojciechowski</i>	
Medicinal plants of Argentina. Pharmacological properties and phytochemistry	209
<i>Zunino M.P., Lopez M.L. and J.A. Zygodlo</i>
