

AMERICAN ACADEMY™
OF OPHTHALMOLOGY

Basic Ophthalmology

Essentials for Medical Students

TENTH EDITION

Executive Editors

Richard C. Allen, MD, PhD

Richard A. Harper, MD

CONTENTS

Preface	ix
Acknowledgments	x
About the Executive Editors	x
Introduction to Ophthalmology	1
Resources from the American Academy of Ophthalmology	1
Meet the Eye Care Team	1
Eye Myths	3
1 The Eye Examination	7
Objectives	7
Relevance	7
Basic Information	8
The Patient's History	8
Ocular Anatomy	9
Anatomic Aging Changes	9
Optics	14
When to Examine	16
Additional Tests	16
How to Examine	17
Visual Acuity	17
Distance Visual Acuity Testing	17
Near Visual Acuity Testing	20
Visual Acuity Estimation in an Uncooperative Patient	22
Confrontation Visual Field Testing	22
Amsler Grid Testing	22
External Inspection	23
Upper Eyelid Eversion	23
Ocular Motility Testing	24
Pupillary Reaction Testing	25
Anterior Chamber Depth Assessment	25
Intraocular Pressure Measurement	26
Color Vision Testing	28
Fluorescein Staining of Cornea	28
Ophthalmoscopy	30
Summary of Steps in the Eye Examination	34
Management or Referral	34

Reduced Visual Acuity	35
Abnormal Fundus Appearance	35
Shallow Anterior Chamber Depth/Elevated Intraocular Pressure	36
Points to Remember	36
Sample Problems	36
Annotated Resources	38
2 Acute Vision Loss	41
Objectives	41
Relevance	41
Basic Information	42
Narrowing the Diagnosis From the History	42
How to Examine	43
Visual Acuity Testing	43
Confrontation Visual Field Testing	43
Pupillary Reactions	43
Red Reflex Evaluation and Ophthalmoscopy	44
Penlight Examination	44
Tonometry	44
How to Interpret the Findings	44
Acute Vision Loss Associated With Pain	44
Acute Vision Loss Without Pain	45
Painless, Acute Vision Loss Without Clear Media	45
Painless, Acute Vision Loss With Clear Media	47
Functional Disorders	55
Points to Remember	55
Sample Problems	56
Annotated Resources	57
3 Chronic Vision Loss	59
Objectives	59
Relevance	59
Basic Information	60
Glaucoma	60
Overview	63
When to Examine	66
How to Examine	66
How to Interpret the Findings	67
Management or Referral	69
Cataract	69
Overview	70
When to Examine	72
How to Examine	73
How to Interpret the Findings	73
Management or Referral	74
Macular Degeneration	74
Overview	74
When to Examine	77
How to Examine	78

How to Interpret the Findings	79
Management or Referral	79
The Visually Impaired Patient	80
Points to Remember	81
Sample Problems	81
Annotated Resources	83

4 The Red Eye 87

Objectives	87
Relevance	87
Basic Information	88
History	88
How to Examine	88
Disorders Associated With a Red Eye	91
The Acute, Painful Red Eye	91
Acute, Nonpainful Red Eye	93
Chronic, Irritated Red Eye	95
Chronic Red Eye Without Irritation	96
Adnexal Disease	96
Further Interpretation of the Findings	97
Symptoms of a Red Eye	97
Signs of a Red Eye	99
Associated Systemic Problems	101
Laboratory Diagnosis	102
Management or Referral	102
Blepharitis	103
Stye and Chalazion	105
Subconjunctival Hemorrhage	106
Conjunctivitis	106
Therapeutic Warnings	107
Points to Remember	107
Sample Problems	108
Annotated Resources	112

5 Ocular and Orbital Injuries 113

Objectives	113
Relevance	113
Basic Information	114
Anatomy and Function	114
When to Examine	117
How to Examine	117
History	118
Visual Acuity Testing	118
External Examination	119
Pupillary Reactions	120
Ocular Motility Testing	121
Ophthalmoscopy	121
Radiologic Studies	121
Management or Referral	121
True Emergency	122

Urgent Situations	122
Treatment Skills	125
Ocular Irrigation	126
Foreign-Body Removal	126
Prescribing Eye Medication	126
Patching	128
Points to Remember	129
Sample Problems	130
Annotated Resources	134

6 Amblyopia and Strabismus **137**

Objectives	137
Relevance	137
Basic Information	138
Amblyopia	138
Strabismus	140
How to Examine and Interpret the Findings	142
Amblyopia Testing	143
Strabismus Testing	145
Other Tests	149
Management or Referral	150
Amblyopia	150
Strabismus	151
Serious Intraocular Lesions	152
Points to Remember	152
Sample Problems	153
Annotated Resources	155

7 Neuro-Ophthalmology **157**

Objectives	157
Relevance	157
Basic Information	157
How to Examine	158
Visual Acuity Testing	158
Visual Field Testing	158
Color Perception and Saturation	159
Pupillary Examination	159
Ocular Motility Testing	162
Ophthalmoscopy	163
How to Interpret the Findings	163
Pupillary Disorders	163
Motility Disorders	167
Optic Nerve Disease	172
Optic Disc Elevation	173
Visual Field Defects	180
Visual Hallucinations	182
Cognitive Vision Loss: The Visual Variant of Alzheimer's Disease	182
Points to Remember	183

Sample Problems	183
Annotated Resources	187
8 Eyelid, Lacrimal, and Orbital Disease	189
Objectives	189
Relevance	189
Eyelid Disorders	190
Eyelid Infections	190
Eyelid Malpositions	191
Eyelid Neoplasms	197
Lacrimal Disease	198
Orbital Disease	200
How to Examine	200
Orbital Neoplasms	201
Inflammatory Processes of the Orbit	203
Vascular Malformations	204
Points to Remember	205
Sample Problems	206
Annotated Resources	209
9 Ocular Manifestations of Systemic Disease	211
Objectives	211
Relevance	211
Diabetes Mellitus	212
Hypertension	216
Arteriolar Sclerosis	216
Elevated Blood Pressure	217
Diagnostic Concerns	218
Management	218
Pregnancy	219
Sickle Cell Anemia	220
Thyroid Disease	220
Sarcoidosis and Other Inflammatory and Autoimmune Conditions	221
Dry Eye Syndrome	222
Malignancy	223
Acquired Immunodeficiency Syndrome	223
Syphilis	225
Other Systemic Infections	226
Points to Remember	227
Sample Problems	227
Annotated Resources	229
10 Drugs and the Eye	231
Objectives	231
Relevance	231
Basic Information	233
Topical Ocular Diagnostic Drugs	234

Fluorescein Dye	234
Anesthetics	235
Mydriatics	235
Topical Ocular Therapeutic Drugs	236
Decongestants	236
Agents for Relief of Allergic Conjunctivitis	237
Anti-inflammatory Agents	237
Agents for the Relief of Dry Eye Symptoms	237
Antibiotics	238
Antiviral Agents	238
Systemic Side Effects of Glaucoma Medications	238
β -Adrenergic Antagonists	239
Cholinergic-Stimulating Drugs	240
α_2 -Adrenoceptor Agonists	240
Adrenergic-Stimulating Drugs	241
Prostaglandin Analogues	241
Carbonic Anhydrase Inhibitors	241
Ocular Side Effects of Systemic Drugs	242
Amiodarone	242
Bisphosphonates	242
Chloroquines	243
Chlorpromazine	244
Corticosteroids	244
Digitalis	244
Diphenylhydantoin	244
Ethambutol	245
HMG-COA Reductase Inhibitors (Statins)	245
Rifabutin	246
Sildenafil, Tadalafil, Vardenafil, and Avanafil	246
Tamoxifen	246
Tamsulosin	247
Thioridazine	247
Topiramate	247
Points to Remember	248
Sample Problems	248
Annotated Resources	251
Index	253
