

Fourth Edition

# BIG JAVA

**CAY S. HORSTMANN**

International Student Version

# CONTENTS

PREFACE **vii**

SPECIAL FEATURES **xxviii**

## CHAPTER 1 INTRODUCTION **1**

- 1.1 What Is Programming? **2**
- 1.2 The Anatomy of a Computer **3**
- 1.3 Translating Human-Readable Programs to Machine Code **7**
- 1.4 The Java Programming Language **9**
- 1.5 The Structure of a Simple Program **11**
- 1.6 Compiling and Running a Java Program **15**
- 1.7 Errors **18**
- 1.8 Algorithms **20**

## CHAPTER 2 AN INTRODUCTION TO OBJECTS AND CLASSES **33**

- 2.1 Objects, Classes, and Methods **34**
- 2.2 Declaring Variables **36**
- 2.3 Constructing Objects **40**
- 2.4 The API Documentation **42**
- 2.5T Implementing a Test Program **45**
- 2.6 Instance Variables **47**
- 2.7 Specifying the Public Interface of a Class **50**
- 2.8 Providing the Class Implementation **55**
- 2.9T Unit Testing **61**
- 2.10 Local Variables **63**
- 2.11 Object References **64**
- 2.12 Implicit Parameters **67**
- 2.13G Graphical Applications and Frame Windows **69**
- 2.14G Drawing on a Component **71**
- 2.15G Ellipses, Lines, Text, and Color **76**
- 2.16G Shape Classes **80**

**CHAPTER 3 FUNDAMENTAL DATA TYPES 105**

- 3.1 Number Types **106**
- 3.2 Constants **111**
- 3.3 Arithmetic Operations and Mathematical Functions **115**
- 3.4 Calling Static Methods **123**
- 3.5 Strings **127**
- 3.6 Reading Input **133**

**CHAPTER 4 DECISIONS 149**

- 4.1 The if Statement **150**
- 4.2 Comparing Values **155**
- 4.3 Multiple Alternatives **163**
- 4.4 Using Boolean Expressions **173**
- 4.5T Code Coverage **180**

**CHAPTER 5 ITERATION 195**

- 5.1 while Loops **196**
- 5.2 for Loops **206**
- 5.3 Common Loop Algorithms **214**
- 5.4 Nested Loops **225**
- 5.5 Application: Random Numbers and Simulations **228**
- 5.6T Using a Debugger **235**

**CHAPTER 6 ARRAYS AND ARRAY LISTS 253**

- 6.1 Arrays **254**
- 6.2 Array Lists **261**
- 6.3 Wrappers and Auto-boxing **267**
- 6.4 The Enhanced for Loop **269**
- 6.5 Partially Filled Arrays **270**
- 6.6 Common Array Algorithms **272**
- 6.7T Regression Testing **284**
- 6.8 Two-Dimensional Arrays **288**

**CHAPTER 7 DESIGNING CLASSES 305**

- 7.1 Discovering Classes **306**
- 7.2 Cohesion and Coupling **307**
- 7.3 Immutable Classes **310**
- 7.4 Side Effects **311**
- 7.5 Preconditions and Postconditions **316**
- 7.6 Static Methods **320**
- 7.7 Static Variables **323**
- 7.8 Scope **326**
- 7.9 Packages **330**
- 7.10T Unit Test Frameworks **337**

**CHAPTER 8 INTERFACES AND POLYMORPHISM 349**

- 8.1 Using Interfaces for Algorithm Reuse **350**
- 8.2 Converting Between Class and Interface Types **356**
- 8.3 Polymorphism **358**
- 8.4 Using Interfaces for Callbacks **359**
- 8.5 Inner Classes **363**
- 8.6T Mock Objects **367**
- 8.7G Events, Event Sources, and Event Listeners **369**
- 8.8G Using Inner Classes for Listeners **372**
- 8.9G Building Applications with Buttons **374**
- 8.10G Processing Timer Events **378**
- 8.11G Mouse Events **381**

**CHAPTER 9 INHERITANCE 397**

- 9.1 Inheritance Hierarchies **398**
- 9.2 Implementing Subclasses **401**
- 9.3 Overriding Methods **405**
- 9.4 Subclass Construction **408**
- 9.5 Converting Between Subclass and Superclass Types **411**
- 9.6 Polymorphism and Inheritance **413**
- 9.7 Object: The Cosmic Superclass **422**
- 9.8G Using Inheritance to Customize Frames **434**

|                   |                                                           |            |
|-------------------|-----------------------------------------------------------|------------|
| <b>CHAPTER 10</b> | <b>INPUT/OUTPUT AND EXCEPTION HANDLING</b>                | <b>445</b> |
| 10.1              | Reading and Writing Text Files                            | 446        |
| 10.2              | Reading Text Input                                        | 451        |
| 10.3              | Throwing Exceptions                                       | 459        |
| 10.4              | Checked and Unchecked Exceptions                          | 461        |
| 10.5              | Catching Exceptions                                       | 463        |
| 10.6              | The finally Clause                                        | 466        |
| 10.7              | Designing Your Own Exception Types                        | 468        |
| 10.8              | Case Study: A Complete Example                            | 469        |
| <b>CHAPTER 11</b> | <b>OBJECT-ORIENTED DESIGN</b>                             | <b>483</b> |
| 11.1              | The Software Life Cycle                                   | 484        |
| 11.2              | Discovering Classes                                       | 489        |
| 11.3              | Relationships Between Classes                             | 491        |
| 11.4              | Case Study: Printing an Invoice                           | 496        |
| 11.5              | Case Study: An Automatic Teller Machine                   | 507        |
| <b>CHAPTER 12</b> | <b>RECURSION</b>                                          | <b>535</b> |
| 12.1              | Triangle Numbers                                          | 536        |
| 12.2              | Recursive Helper Methods                                  | 544        |
| 12.3              | The Efficiency of Recursion                               | 546        |
| 12.4              | Permutations                                              | 551        |
| 12.5              | Mutual Recursions                                         | 557        |
| <b>CHAPTER 13</b> | <b>SORTING AND SEARCHING</b>                              | <b>573</b> |
| 13.1              | Selection Sort                                            | 574        |
| 13.2              | Profiling the Selection Sort Algorithm                    | 577        |
| 13.3              | Analyzing the Performance of the Selection Sort Algorithm | 580        |
| 13.4              | Merge Sort                                                | 584        |
| 13.5              | Analyzing the Merge Sort Algorithm                        | 587        |
| 13.6              | Searching                                                 | 592        |
| 13.7              | Binary Search                                             | 594        |
| 13.8              | Sorting Real Data                                         | 597        |
| <b>CHAPTER 14</b> | <b>AN INTRODUCTION TO DATA STRUCTURES</b>                 | <b>607</b> |
| 14.1              | Using Linked Lists                                        | 608        |
| 14.2              | Implementing Linked Lists                                 | 614        |
| 14.3              | Abstract Data Types                                       | 625        |
| 14.4              | Stacks and Queues                                         | 629        |

**CHAPTER 15 ADVANCED DATA STRUCTURES 643**

- 15.1 Sets **644**
- 15.2 Maps **648**
- 15.3 Hash Tables **652**
- 15.4 Computing Hash Codes **659**
- 15.5 Binary Search Trees **664**
- 15.6 Binary Tree Traversal **674**
- 15.7 Priority Queues **676**
- 15.8 Heaps **677**
- 15.9 The Heapsort Algorithm **687**

**CHAPTER 16 GENERIC PROGRAMMING 701**

- 16.1 Generic Classes and Type Parameters **702**
- 16.2 Implementing Generic Types **703**
- 16.3 Generic Methods **706**
- 16.4 Constraining Type Parameters **708**
- 16.5 Type Erasure **710**

**CHAPTER 17 GRAPHICAL USER INTERFACES (ADVANCED) 717**

- 17.1G Processing Text Input **718**
- 17.2G Text Areas **721**
- 17.3G Layout Management **724**
- 17.4G Choices **726**
- 17.5G Menus **736**
- 17.6G Exploring the Swing Documentation **742**

**CHAPTER 18 STREAMS AND BINARY INPUT/OUTPUT (ADVANCED) 755**

- 18.1 Readers, Writers, and Streams **756**
- 18.2 Binary Input and Output **757**
- 18.3 Random Access **763**
- 18.4 Object Streams **768**

**CHAPTER 19 MULTITHREADING (ADVANCED) 779**

- 19.1 Running Threads **780**
- 19.2 Terminating Threads **785**
- 19.3 Race Conditions **787**
- 19.4 Synchronizing Object Access **793**
- 19.5 Avoiding Deadlocks **796**
- 19.6G Case Study: Algorithm Animation **802**

|                   |                                                |            |
|-------------------|------------------------------------------------|------------|
| <b>CHAPTER 20</b> | <b>INTERNET NETWORKING (ADVANCED)</b>          | <b>817</b> |
| 20.1              | The Internet Protocol                          | 818        |
| 20.2              | Application Level Protocols                    | 820        |
| 20.3              | A Client Program                               | 823        |
| 20.4              | A Server Program                               | 826        |
| 20.5              | URL Connections                                | 834        |
| <br>              |                                                |            |
| <b>CHAPTER 21</b> | <b>RELATIONAL DATABASES (ADVANCED)</b>         | <b>843</b> |
| 21.1              | Organizing Database Information                | 844        |
| 21.2              | Queries                                        | 851        |
| 21.3              | Installing a Database                          | 859        |
| 21.4              | Database Programming in Java                   | 864        |
| 21.5              | Case Study: A Bank Database                    | 871        |
| <br>              |                                                |            |
| <b>CHAPTER 22</b> | <b>XML (ADVANCED)</b>                          | <b>883</b> |
| 22.1              | XML Tags and Documents                         | 884        |
| 22.2              | Parsing XML Documents                          | 892        |
| 22.3              | Creating XML Documents                         | 901        |
| 22.4              | Validating XML Documents                       | 907        |
| <br>              |                                                |            |
| <b>CHAPTER 23</b> | <b>WEB APPLICATIONS (ADVANCED)</b>             | <b>925</b> |
| 23.1              | The Architecture of a Web Application          | 926        |
| 23.2              | The Architecture of a JSF Application          | 928        |
| 23.3              | JavaBeans Components                           | 934        |
| 23.4              | Navigation Between Pages                       | 935        |
| 23.5              | JSF Components                                 | 941        |
| 23.6              | A Three-Tier Application                       | 943        |
| <br>              |                                                |            |
| <b>APPENDICES</b> |                                                |            |
| APPENDIX A        | THE BASIC LATIN AND LATIN-1 SUBSETS OF UNICODE | 957        |
| APPENDIX B        | JAVA OPERATOR SUMMARY                          | 961        |
| APPENDIX C        | JAVA RESERVED WORD SUMMARY                     | 963        |
| APPENDIX D        | THE JAVA LIBRARY                               | 965        |
| APPENDIX E        | JAVA SYNTAX SUMMARY                            | 1007       |
| APPENDIX F        | HTML SUMMARY                                   | 1018       |
| APPENDIX G        | TOOL SUMMARY                                   | 1023       |
| APPENDIX H        | JAVADOC SUMMARY                                | 1026       |
| APPENDIX I        | NUMBER SYSTEMS                                 | 1028       |
| APPENDIX J        | BIT AND SHIFT OPERATIONS                       | 1033       |
