

Companion to 'Illustrated Physiology'

Ann B. McNaught

Second Edition

Churchill Livingstone

CONTENTS

1. INTRODUCTION: The TISSUES		1-18
The Amoeba	1	Connective Tissues 9
The Phenomena of Life	1	Muscular Tissues 11
The Paramecium	3	Nervous Tissues 12
The Cell	4	Cell Division 14
Differentiation of Animal Cells	5	The Body Systems 15
Organization of Tissues	6	"Master" Tissues 16
Epithelia	6	"Vegetative" Tissues 17
2. NUTRITION and METABOLISM—The SOURCES, RELEASE, REQUIREMENTS and USES of ENERGY		19-46
Basic Constituents of		Protective Foods 26
Protoplasm	19	Digestion 30
Carbohydrates	20	Metabolism 31
Fats	20	Release of Energy 31
Proteins	21	Basal Metabolism 33
Nucleic Acids	21	Energy Requirements 34
Source of Energy:		Energy Values of Foods 38
Photosynthesis	22	Balanced Diet 38
Carbon Cycle	23	Uses of Energy 40
Nitrogen Cycle	23	Heat Balance 41
Nutrition and Metabolism	24	Maintenance of Body
Energy-giving Foods	24	Temperature 44
Body-building Foods	25	
3. DIGESTIVE SYSTEM		47-68
Digestive System	47	Small Intestine 59
Digestion in Mouth	47	Intestinal Juice 61
Control of Salivary Secretion	48	Movements of Small Intestine 61
Oesophagus	49	Absorption in Small Intestine 62
Swallowing	50	Transport of Absorbed
Stomach	51	Foodstuffs 64
Gastric Juice	52	Large Intestine 64
Movements of Stomach	54	Movements of Large Intestine 66
Pancreas	56	Innervation of Gut Wall 67
Pancreatic Juice	56	Nervous Control of Gut
Liver and Gall Bladder	57	Movements 68
Expulsion of Bile	58	
4. TRANSPORT SYSTEM—The HEART, BLOOD VESSELS, BODY FLUIDS and the HAEMOPOIETIC SYSTEM		69-106
Cardiovascular System	69	Cardiac Reflexes 74
Heart	69	Cardiac Output 76
Cardiac Cycle	70	Blood Vessels 77
Heart Sounds	71	Elastic Arteries 77
Origin and Conduction of		Pulse 78
the Heart Beat	72	Muscular Arteries 78
Nervous Regulation of		Nervous Regulation of Muscular
Action of Heart	73	Arteries and Arterioles 78

Reflex and Chemical		Blood	89
Regulation of Arteriolar Tone	79	Haemopoiesis	94
Capillaries	81	Factors Required for	
Veins	83	Normal Haemopoiesis	95
Blood Flow	84	Blood Coagulation	97
Blood Pressure	84	Blood Groups	98
Measurement of Arterial B.P.	86	Blood Group Determination	100
Pulmonary Circulation	87	Rhesus Factor	101
Distribution of Water and		Lymphatic System	102
Electrolytes in Body Fluids	87	Spleen	104
Water Balance	88	Cerebrospinal Fluid	105

5. RESPIRATORY SYSTEM 107-120

Respiratory System	107	Dissociation of Oxygen	
Air-conducting Passages	107	from Haemoglobin	114
Lungs: Respiratory Surfaces	108	Uptake and Release of CO ₂	115
Thorax	109	Carriage & Transfer of O ₂ , CO ₂	116
Mechanism of Breathing	109	Nervous Control of	
Artificial Respiration	111	Respiratory Movements	117
Capacity of Lungs	111	Chemical Regulation of	
Composition of Respired Air	112	Respiration	118
Movement of Respiratory		Voluntary and Reflex Factors	
Gases	113	in Regulation of Respiration	119

6. EXCRETORY SYSTEM 121-132

Excretory System	121	Maintenance of Acid-Base	
Kidney	121	Balance	126
Formation of Urine: Filtration	122	Regulation of Water Balance	127
Formation of Urine:		Urine	129
Reabsorption	124	Urinary Bladder and Ureters	131
Formation of Urine:		Storage & Expulsion of	
Secretion and Synthesis	126	Urine	131

7. ENDOCRINE SYSTEM 133-152

Endocrine System	133	Anterior Pituitary	145
Thyroid	136	Underactivity of Anterior	
Underactivity of Thyroid	137	Pituitary	146
Overactivity of Thyroid	137	Overactivity of Anterior	
Parathyroids	138	Pituitary	
Underactivity of Parathyroids	138	a) Eosinophil Cells	147
Overactivity of Parathyroids	139	b) Basophil Cells	148
Suprarenal Glands	139	Posterior Pituitary	148
Underactivity of Suprarenal		Antidiuretic Hormone	148
Cortex	141	Oxytocin	149
Overactivity of Suprarenal		Underactivity of Posterior	
Cortex	141	Pituitary	149
Suprarenal Medulla	142	Aldosterone and ADH:	
Underactivity of Suprarenal		Maintenance of Blood Volume	150
Medullae	144	Pancreas: Islets of Langerhans	151
Overactivity of Suprarenal		Underactivity of Islets of	
Medullae	144	Langerhans	151

Overactivity of Islets of		Thymus	152
Langerhans	152		

8. REPRODUCTIVE SYSTEM 153-168

Male Reproductive System	153	Placenta	161
Testis	153	Foetal Circulation	162
Secondary Sex Organs	154	Uterus in Parturition	163
Puberty in Male	155	Uterus after Parturition	164
Female Reproductive System	156	Uterus in Puerperium	164
Ovary in Ordinary Adult		Mammary Glands in Ordinary	
Cycle	156	Cycle	165
Ovary in Pregnancy	158	Mammary Glands in	
Pelvic Sex Organs in Ordinary		Pregnancy	165
Female Cycle	158	Puberty in Female	166
Uterus and Uterine Tubes in		Ovarian Hormones	167
Cycle ending in pregnancy	160	Menopause	168

9. "MASTER" TISSUES: CENTRAL NERVOUS SYSTEM, LOCOMOTOR SYSTEM, AUTONOMIC NERVOUS SYSTEM 169-222

Nervous System	169	Vestibular Pathways to	
Synapse	170	Brain	203
Reflex Action	170	General Proprioceptors	204
"Edifice" of the C.N.S.	171	Proprioceptor Pathways to	
Nerve Impulse	172	Brain	204
Brain	175	Cutaneous Sensation	205
Cranial Nerves	179	Sensory Pathways to the	
Spinal Cord	180	Cerebral Cortex	206
Sense Organs	181	Sensory Cortex	207
Smell	183	Motor Cortex	207
Taste	184	Motor Pathways to Head and	
Pathways and Centres for		Neck	208
Taste	186	Motor Pathways to	
Eye	186	Trunk and Limbs	208
Protection of the Eye	188	Motor Unit	209
Muscles of Eye	188	Transmission at the Skeletal	
Control of Eye Movements	189	Neuromuscular Junction	209
Action of Lens	190	Final Common Pathway	210
Fundus Oculi	191	Extrapyramidal System	212
Retina	192	Cerebellum	213
Mechanism of Vision	193	Control of Muscular	
Visual Pathways to the Brain	195	Movement	214
Stereoscopic Vision	196	Maintenance of "Tone" in	
Light Reflex	197	Skeletal Muscle	215
Ear	197	Locomotor System	215
Cochlea	198	Skeletal Muscles	216
Mechanism of Hearing	199	Reciprocal Innervation	217
Auditory Pathways to Brain	201	Autonomic Nervous System	218
Special Proprioceptors	202	Autonomic Reflex	220
Organ of Equilibrium:		Chemical Transmission at	
Mechanism of Action	202	Nerve Endings	221
