

International
Edition

Database Processing

FUNDAMENTALS, DESIGN, AND IMPLEMENTATION

Twelfth Edition

David M. Kroenke
David J. Auer

PEARSON

Preface 15

PART 1 • GETTING STARTED

29

Chapter 1: Introduction 30

Chapter Objectives 30

The Characteristics of Databases 31

A Note on Naming Conventions 31 • A Database Has Data and Relationships 32 •
Databases Create Information 33

Database Examples 34

Single-User Database Applications 34 • Multiuser Database Applications 34
E-Commerce Database Applications 35 • Reporting and Data Mining Database
Applications 35

The Components of a Database System 36

Database Applications and SQL 37 • The DBMS 39 • The Database 40

Personal Versus Enterprise-Class Database Systems 41

What Is Microsoft Access? 41 • What Is an Enterprise-Class Database System? 43

Database Design 44

Database Design from Existing Data 45 • Database Design for New Systems
Development 45 • Database Redesign 46

What You Need to Learn 47

A Brief History of Database Processing 48

The Early Years 48 • The Emergence and Dominance of the Relational
Model 50 • Post-Relational Developments 51

*Summary 53 • Key Terms 54 • Review Questions 54 • Project
Questions 56*

Chapter 2: Introduction to Structured Query Language 59

Chapter Objectives 59

Components of a Data Warehouse 60

Cape Codd Outdoor Sports 61

The Extracted Retail Sales Data 61 • RETAIL_ORDER Data 63 • ORDER_ITEM
Data 63 • SKU_DATA Table 64 • The Complete Cape Codd Data Extract
Schema 64 • Data Extracts Are Common 65

SQL Background 65

The SQL SELECT/FROM/WHERE Framework 66

Reading Specified Columns from a Single Table 66 • Specifying Column Order in
SQL Queries from a Single Table 67 • Reading Specified Rows from a Single
Table 69 • Reading Specified Columns and Rows from a Single Table 70

Submitting SQL Statements to the DBMS 71

Using SQL in Microsoft Access 2010 71 • Using SQL in Microsoft SQL Server
2008 R2 76 • Using SQL in Oracle Database 11g 79 • Using SQL in Oracle
MySQL 5.5 82

SQL Enhancements for Querying a Single Table	84
Sorting the SQL Query Results	84 • SQL WHERE Clause Options 86
Combining the SQL WHERE Clause and the SQL ORDER BY Clause	91
Performing Calculations in SQL Queries	91
Using SQL Built-in Functions	91 • SQL Expressions in SQL SELECT Statements 94
Grouping in SQL SELECT Statements	96
Looking for Patterns in NASDAQ Trading	100
Investigating the Characteristics of the Data	100 • Searching for Patterns in Trading by Day of Week 101
Querying Two or More Tables with SQL	103
Querying Multiple Tables with Subqueries	103 • Querying Multiple Tables with Joins 106 • Comparing Subqueries and Joins 110
<i>Summary</i>	110 • <i>Key Terms</i> 110 • <i>Review Questions</i> 111 • <i>Project Questions</i> 116 • <i>Marcia's Dry Cleaning</i> 120 • <i>Morgan Importing</i> 122

PART 2 • DATABASE DESIGN

127

Chapter 3: The Relational Model and Normalization 128

Chapter Objectives	128
Relational Model Terminology	130
Relations	131 • Characteristics of Relations 131 • Alternative Terminology 133 • Functional Dependencies 134 • Finding Functional Dependencies 135 • Keys 138
Normal Forms	140
Modification Anomalies	140 • A Short History of Normal Forms 141 • Normalization Categories 141 • From First Normal Form to Boyce-Codd Normal Form Step-By-Step 142 • Eliminating Anomalies from Functional Dependencies with BCNF 146 • Eliminating Anomalies from Multivalued Dependencies 154 • Fifth Normal Form 158 • Domain/Key Normal Form 158
<i>Summary</i>	159 • <i>Key Terms</i> 159 • <i>Review Questions</i> 160 • <i>Project Questions</i> 162 • <i>Marcia's Dry Cleaning</i> 163 • <i>Morgan Importing</i> 163

Chapter 4: Database Design Using Normalization 165

Chapter Objectives	165
Assess Table Structure	166
Designing Updatable Databases	167
Advantages and Disadvantages of Normalization	167 • Functional Dependencies 167 • Normalizing with SQL 168 • Choosing Not to Use BCNF 169 • Multivalued Dependencies 170
Designing Read-Only Databases	170
Denormalization	170 • Customized Duplicated Tables 172
Common Design Problems	173
The Multivalued, Multicolumn Problem	173 • Inconsistent Values 175 • Missing Values 176 • The General-Purpose Remarks Column 176
<i>Summary</i>	177 • <i>Key Terms</i> 178 • <i>Review Questions</i> 178 • <i>Project Questions</i> 180 • <i>Marcia's Dry Cleaning</i> 180 • <i>Morgan Importing</i> 181

Chapter 5: Data Modeling with the Entity-Relationship Model 183

Chapter Objectives	183
The Purpose of a Data Model	184

The Entity-Relationship Model	184
Entities	184 • Attributes 185 • Identifiers 186 • Relationships 186
• Maximum Cardinality	188 • Minimum Cardinality 189 • Entity-Relationship Diagrams and Their Versions 190 • Variations of the E-R Model 190
• E-R Diagrams Using the IE Crow's Foot Model	191 • Strong Entities and Weak Entities 192 • ID-Dependent Entities 192 • Non-ID-Dependent Weak Entities 193 • The Ambiguity of the Weak Entity 194 • Subtype Entities 195
Patterns in Forms, Reports, and E-R Models	196
Strong Entity Patterns	197 • ID-Dependent Relationships 201 • Mixed Identifying and Nonidentifying Patterns 207 • The For-Use-By Pattern 210 • Recursive Patterns 211
The Data Modeling Process	213
The College Report	214 • The Department Report 215 • The Department/Major Report 217 • The Student Acceptance Letter 217
<i>Summary</i>	219 • <i>Key Terms</i> 220 • <i>Review Questions</i> 221 • <i>Project Questions</i> 223 • <i>Marcia's Dry Cleaning</i> 229 • <i>Morgan Importing</i> 230

Chapter 6: Transforming Data Models into Database Designs 231

Chapter Objectives	231
Create a Table for Each Entity	232
Selecting the Primary Key	232 • Specifying Candidate (Alternate) Keys 234 • Specify Column Properties 234 • Verify Normalization 236
Create Relationships	237
Relationships Between Strong Entities	237 • Relationships Using ID-Dependent Entities 240 • Relationships with a Weak Non-ID-Dependent Entity 245 • Relationships in Mixed Entity Designs 245 • Relationships Between Supertype and Subtype Entities 247 • Recursive Relationships 247 • Representing Ternary and Higher-Order Relationships 249 • Relational Representation of the Highline University Data Model 252
Design for Minimum Cardinality	253
Actions When the Parent Is Required	255 • Actions When the Child Is Required 256 • Implementing Actions for M-O Relationships 256 • Implementing Actions for O-M Relationships 257 • Implementing Actions for M-M Relationships 258 • Designing Special Case M-M Relationships 258 • Documenting the Minimum Cardinality Design 259 • An Additional Complication 261 • Summary of Minimum Cardinality Design 261
The View Ridge Gallery Database	261
Summary of Requirements	261 • The View Ridge Data Model 262 • Database Design with Data Keys 263 • Minimum Cardinality Enforcement for Required Parents 264 • Minimum Cardinality Enforcement for the Required Child 266 • Column Properties for the View Ridge Database Design Tables 266
<i>Summary</i>	268 • <i>Key Terms</i> 269 • <i>Review Questions</i> 270 • <i>Project Questions</i> 271 • <i>Marcia's Dry Cleaning</i> 272 • <i>Morgan Importing</i> 272

PART 3 • DATABASE IMPLEMENTATION

273

Chapter 7: SQL for Database Construction and Application Processing 274

Chapter Objectives	274
The View Ridge Gallery Database	275
SQL DDL, DML, and a New Type of Join	275
Managing Table Structure with SQL DDL	276
Creating the View Ridge Database	276 • Using the SQL CREATE TABLE Statement 277 • Variations in SQL Data Types 278 • Creating the ARTIST

Table	280	•	Creating the WORK Table and the 1:N ARTIST-to-WORK Relationship	282	•	Implementing Required Parent Rows	283	•	Implementing 1:1 Relationships	284	•	Casual Relationships	284	•	Creating Default Values and Data Constraints with SQL	284	•	Creating the View Ridge Database Tables	286	•	The SQL ALTER TABLE Statement	289	•	The SQL DROP TABLE Statement	290	•	The SQL TRUNCATE TABLE Statement	291
SQL DML Statements	291																											
The SQL INSERT Statement	291	•	Populating the View Ridge Database Tables	292	•	The SQL UPDATE Statement	298	•	The SQL MERGE Statement	299	•	The SQL DELETE Statement	300															
New Forms of Join	300																											
The SQL JOIN ON Syntax	300	•	Outer Joins	302																								
Using SQL Views	305																											
Using SQL Views to Hide Columns and Rows	308	•	Using SQL Views to Display Results of Computed Columns	309	•	Using SQL Views to Hide Complicated SQL Syntax	310	•	Layering Built-in Functions	312	•	Using SQL Views for Isolation, Multiple Permissions, and Multiple Triggers	313	•	Updating SQL Views	314												
Embedding SQL in Program Code	315																											
SQL/Persistent Stored Modules (SQL/PSM)	316	•	Using SQL Triggers	317	•	Using Stored Procedures	323																					
Summary	326	•	Key Terms	327	•	Review Questions	327	•	Project Questions	331	•	Marcia's Dry Cleaning	334	•	Morgan Importing	337												

Chapter 8: Database Redesign 341

Chapter Objectives	341
The Need for Database Redesign	342
SQL Statements for Checking Functional Dependencies	342
What Is a Correlated Subquery?	343
How Do I Analyze an Existing Database?	348
Reverse Engineering	348
Dependency Graphs	350
Database Backup and Test Databases	350
Changing Table Names and Table Columns	351
Changing Table Names	351
Adding and Dropping Columns	353
Changing a Column Data Type or Column Constraints	354
Adding and Dropping Constraints	354
Changing Relationship Cardinalities and Properties	354
Changing Minimum Cardinalities	355
Changing Maximum Cardinalities	356
Adding and Deleting Tables and Relationships	359
Forward Engineering(?)	359
Summary	359
Key Terms	361
Review Questions	361
Project Questions	363
Marcia's Dry Cleaning	363
Morgan Importing	364

PART 4 • MULTIUSER DATABASE PROCESSING

365

Chapter 9: Managing Multiuser Databases 366

Chapter Objectives	366
Database Administration	367
Managing the Database Structure	368
Concurrency Control	369
The Need for Atomic Transactions	370
Resource Locking	374
Optimistic Versus Pessimistic Locking	376
Declaring Lock Characteristics	377
Implicit and Explicit Commit Transaction	378
Consistent Transactions	379
Transaction Isolation Level	380
Cursor Type	381

Database Security 382

Processing Rights and Responsibilities 382 • DBMS Security 383 • DBMS Security Guidelines 384 • Application Security 386 • The SQL Injection Attack 387

Database Backup and Recovery 387

Recovery via Reprocessing 388 • Recovery via Rollback/Rollforward 388

Managing the DMBS 390

Maintaining the Data Repository 391

Distributed Database Processing 392

Types of Distributed Databases 392 • Challenges of Distributed Databases 393

Object-Relational Databases 394

Summary 395 • *Key Terms* 396 • *Review Questions* 397 • *Project Questions* 399 • *Marcia's Dry Cleaning* 399 • *Morgan Importing* 400

Chapter 10: Managing Databases with SQL Server 2008 R2 401**Chapter Objectives 401****Installing SQL Server 2008 R2 402****The Microsoft SQL Server 2008 R2 Management Studio 404****Creating an SQL Server 2008 R2 Database 404****SQL Server 2008 R2 Utilities 406**

SQL CMD and Microsoft PowerShell 407 • Microsoft SQL CLR 407 • SQL Server 2008 R2 GUI Displays 408 • SQL Server 2008 R2 SQL Statements and SQL Scripts 409

Creating and Populating the View Ridge Database Tables 411

Creating the View Ridge Database Table Structure 411 • Reviewing Database Structures in the SQL Server GUI Display 415 • Indexes 419 • Populating the VRG Tables with Data 421 • Creating Views 424

SQL Server Application Logic 432

Transact-SQL 433 • Transact-SQL Cursor Statements 434 • Stored Procedures 436 • Triggers 444

Concurrency Control 459

Transaction Isolation Level 460 • Cursor Concurrency 460 • Locking Hints 460

SQL Server 2008 R2 Security 461

SQL Server Database Security Settings 464

SQL Server 2008 R2 Backup and Recovery 465

Backing Up a Database 466 • SQL Server Recovery Models 467 • Restoring a Database 467 • Database Maintenance Plans 468

Topics Not Discussed in This Chapter 468

Summary 468 • *Key Terms* 469 • *Review Questions* 469 • *Project Questions* 471 • *Marcia's Dry Cleaning* 473 • *Morgan Importing* 473

ONLINE CHAPTER: SEE PAGE 475 FOR INSTRUCTIONS**Chapter 10A: Managing Databases with Oracle Database 11g 10A-1****Chapter Objectives 10A-1****Installing Oracle Database 11g 10A-2**

Installing a Loopback Adapter 10A-3 • Oracle Database and Java 10A-4 • Oracle Database 11g Documentation 10A-4 • The Oracle Universal Installer (OUI) 10A-5

Oracle Database 11g Administration and Development Tools 10A-7

The Oracle Database 11g Configuration Assistant 10A-7 • The Oracle Enterprise Manager 11g Database Control 10A-8

Oracle Tablespace 10A-10**Oracle Database Security 10A-13**

User Privileges 10A-14 • Creating a User Account 10A-14 • Creating a Role 10A-17

Oracle Application Development Tools 10A-19

Oracle SQL*Plus 10A-19 • Oracle SQL Developer 10A-20 • Oracle Schemas 10A-22

Oracle Database 11g SQL Statements and SQL Scripts 10A-22

Creating and Populating the View Ridge Database Tables	10A-24
Creating the View Ridge Database Table Structure	10A-24 • Transaction COMMIT in Oracle Database 10A-27 • Reviewing Database Structures in the SQL Developer GUI Display 10A-28 • Indexes 10A-31 • Populating the VRG Tables 10A-32 • Creating Views 10A-41
Application Logic	10A-45
Oracle Database PL/SQL	10A-45 • Stored Procedures 10A-48 • Triggers 10A-55
Concurrency Control	10A-69
Read-Committed Transaction Isolation Level	10A-70 • Serializable Transaction Isolation Level 10A-70 • Read-Only Transaction Isolation 10A-71 • Additional Locking Comments 10A-71
Oracle Database Backup and Recovery	10A-71
Oracle Database Recovery Facilities	10A-71 • Types of Failure 10A-72
Topics Not Discussed in This Chapter	10A-73
<i>Summary</i>	10A-73 • <i>Key Terms</i> 10A-74 • <i>Review Questions</i> 10A-74 • <i>Project Questions</i> 10A-76 • <i>Marcia's Dry Cleaning</i> 10A-78 • <i>Morgan Importing</i> 10A-78

ONLINE CHAPTER: SEE PAGE 476 FOR INSTRUCTIONS

Chapter 10B: Managing Databases with MySQL 5.5 10B-1

Chapter Objectives	10B-1
The MySQL 5.5 DBMS	10B-2
Installing and Updating MySQL	10B-3
Configuring MySQL	10B-4 • MySQL Storage Engines 10B-6
The MySQL GUI Utilities	10B-6
Creating a Workspace for the MySQL Workbench Files	10B-8
Creating and Using a MySQL Database	10B-8
Creating a Database in MySQL	10B-8 • Setting the Active Database in MySQL 10B-12
MySQL Utilities	10B-13
MySQL Command-Line Client	10B-13 • MySQL GUI Displays 10B-14 • MySQL SQL Statements and SQL Scripts 10B-14
Creating and Populating the View Ridge Database Tables	10B-17
Creating the View Ridge Database Table Structure	10B-17 • Reviewing Database Structures in the MySQL GUI Display 10B-20 • Indexes 10B-21 • Populating the VRG Tables with Data 10B-26 • Transaction COMMIT in MySQL 10B-34 • Creating Views 10B-35
MySQL Application Logic	10B-38
MySQL Procedural Statements	10B-38 • Stored Procedures 10B-41 • Triggers 10B-48 • A Last Word on MySQL Stored Procedures and Triggers 10B-61
Concurrency Control	10B-61
MySQL 5.5 Security	10B-62
MySQL Database Security Settings	10B-64
MySQL 5.5 DBMS Backup and Recovery	10B-68
Backing Up a MySQL Database	10B-68 • Restoring a MySQL Database 10B-71
Topics Not Discussed in This Chapter	10B-71
<i>Summary</i>	10B-71 • <i>Key Terms</i> 10B-72 • <i>Review Questions</i> 10B-73 • <i>Project Questions</i> 10B-74 • <i>Marcia's Dry Cleaning</i> 10B-75 • <i>Morgan Importing</i> 10B-76

PART 5 • DATABASE ACCESS STANDARDS

477

Chapter 11: The Web Server Environment 478

Chapter Objectives	478
The Web Database Processing Environment	479
The ODBC Standard	481
ODBC Architecture	481 • Conformance Levels 482 • Creating an ODBC Data Source Name 484

The Microsoft .NET Framework and ADO.NET	490
OLE DB	491 • ADO and ADO.NET 494 • The ADO.NET Object Model 495
The JAVA Platform	499
JDBC	499 • JavaServer Pages (JSP) and Servlets 501 • Apache Tomcat 501
Web Database Processing with PHP	502
Web Database Processing with PHP and Eclipse	503 • Getting Started with HTML Web Pages 505 • The index.html Web Page 506 • Creating the index.html Web Page 506 • Using PHP 508 • Challenges for Web Database Processing 515
Web Page Examples with PHP	515
Example 1: Updating a Table	517 • Example 2: Using PHP Data Objects (PDO) 521 • Example 3: Invoking a Stored Procedure 523
<i>Summary</i>	528 • <i>Key Terms</i> 529 • <i>Review Questions</i> 531 • <i>Project Questions</i> 533 • <i>Marcia's Dry Cleaning</i> 534 • <i>Morgan Importing</i> 535

Chapter 12: Database Processing with XML 537

Chapter Objectives	537
The Importance of XML	538
XML as a Markup Language	539
XML Document Type Declarations	539 • Materializing XML Documents with XSLT 540
XML Schema	544
XML Schema Validation	545 • Elements and Attributes 545 • Flat Versus Structured Schemas 547 • Global Elements 549
Creating XML Documents from Database Data	553
Using the SQL SELECT . . . FOR XML Statement	553 • Multitable SELECT with FOR XML 558 • An XML Schema for All CUSTOMER Purchases 562 • A Schema with Two Multivalued Paths 565
Why Is XML Important?	565
Additional XML Standards	571
The NoSQL Movement	573
<i>Summary</i>	573 • <i>Key Terms</i> 574 • <i>Review Questions</i> 575 • <i>Project Questions</i> 576 • <i>Marcia's Dry Cleaning</i> 576 • <i>Morgan Importing</i> 576

Chapter 13: Database Processing for Business Intelligence Systems 577

Chapter Objectives	577
Business Intelligence Systems	577
The Relationship Between Operational and BI Systems	578
Reporting Systems and Data Mining Applications	578
Reporting Systems	578 • Data Mining Applications 578
Data Warehouses and Data Marts	579
Components of a Data Warehouse	579 • Data Warehouses Versus Data Marts 582 • Dimensional Databases 583
Reporting Systems	591
RFM Analysis	591 • Producing the RFM Report 592 • Reporting System Components 595 • Report Types 596 • Report Media 596 • Report Modes 597 • Report System Functions 597 • OLAP 600
Data Mining	605
Unsupervised Data Mining	606 • Supervised Data Mining 608 • Three Popular Data Mining Techniques 608 • Market Basket Analysis 608 • Using SQL for Market Basket Analysis 610
<i>Summary</i>	610 • <i>Key Terms</i> 611 • <i>Review Questions</i> 612 • <i>Project Questions</i> 614 • <i>Marcia's Dry Cleaning</i> 616 • <i>Morgan Importing</i> 617
