# DATABASE SYSTEMS

Design, Implementation  
and Management

NINTH EDITION

# TABLE OF CONTENTS

## PART I DATABASE CONCEPTS

|   |           |
|---|-----------|
| <b>Business Vignette: The Relational Revolution</b>         | <b>3</b>  |
| <b>CHAPTER 1 DATABASE SYSTEMS</b>                           | <b>4</b>  |
| <b>1.1 Why Databases?</b>                                   | <b>5</b>  |
| <b>1.2 Data vs. Information</b>                             | <b>5</b>  |
| <b>1.3 Introducing the Database</b>                         | <b>7</b>  |
| 1.3.1 Role and Advantages of the DBMS                       | 7         |
| 1.3.2 Types of Databases                                    | 9         |
| <b>1.4 Why Database Design Is Important</b>                 | <b>10</b> |
| <b>1.5 Evolution of File System Data Processing</b>         | <b>11</b> |
| 1.5.1 Manual File Systems                                   | 11        |
| 1.5.2 Computerized File Systems                             | 11        |
| 1.5.3 File System Redux: Modern End-User Productivity Tools | 14        |
| <b>1.6 Problems with File System Data Processing</b>        | <b>14</b> |
| 1.6.1 Structural and Data Dependence                        | 15        |
| 1.6.2 Data Redundancy                                       | 16        |
| 1.6.3 Lack of Design and Data-Modeling Skills               | 17        |
| <b>1.7 Database Systems</b>                                 | <b>17</b> |
| 1.7.1 The Database System Environment                       | 18        |
| 1.7.2 DBMS Functions  | 20        |
| 1.7.3 Managing the Database System: A Shift in Focus        | 23        |
| <b>Summary</b>  | <b>25</b> |
| <b>Key Terms</b>  | <b>25</b> |
| <b>Review Questions</b>                                     | <b>26</b> |
| <b>Problems</b>   | <b>26</b> |
| <br>  |           |
| <b>CHAPTER 2 DATA MODELS</b>                                | <b>29</b> |
| <b>2.1 Data Modeling and Data Models</b>                    | <b>30</b> |
| <b>2.2 The Importance of Data Models</b>                    | <b>30</b> |
| <b>2.3 Data Model Basic Building Blocks</b>                 | <b>31</b> |
| <b>2.4 Business Rules</b>                                   | <b>32</b> |
| 2.4.1 Discovering Business Rules                            | 33        |
| 2.4.2 Translating Business Rules into Data Model Components | 33        |
| 2.4.3 Naming Conventions                                    | 34        |
| <b>2.5 The Evolution of Data Models</b>                     | <b>34</b> |
| 2.5.1 Hierarchical and Network Models                       | 35        |
| 2.5.2 The Relational Model                                  | 36        |
| 2.5.3 The Entity Relationship Model                         | 38        |
| 2.5.4 The Object-Oriented (OO) Model                        | 40        |
| 2.5.5 Newer Data Models: Object/Relational and XML          | 42        |
| 2.5.6 The Future of Data Models                             | 43        |
| 2.5.7 Data Models: A Summary                                | 43        |
| <b>2.6 Degrees of Data Abstraction</b>                      | <b>46</b> |
| 2.6.1 The External Model                                    | 46        |
| 2.6.2 The Conceptual Model                                  | 48        |
| 2.6.3 The Internal Model                                    | 49        |
| 2.6.4 The Physical Model                                    | 49        |

## TABLE OF CONTENTS

|   |            |
|---|------------|
| <b>15.8 Developing a Data Administration Strategy</b>                         | <b>637</b> |
| <b>15.9 The DBA at Work: Using Oracle for Database Administration</b>         | <b>639</b> |
| 15.9.1 Oracle Database Administration Tools                                   | 640        |
| 15.9.2 The Default Login  | 640        |
| 15.9.3 Ensuring an Automatic RDBMS Start                                      | 641        |
| 15.9.4 Creating Tablespaces and Datafiles                                     | 642        |
| 15.9.5 Managing the Database Objects: Tables, Views, Triggers, and Procedures | 643        |
| 15.9.6 Managing Users and Establishing Security                               | 644        |
| 15.9.7 Customizing the Database Initialization Parameters                     | 647        |
| <b>Summary</b>  | <b>648</b> |
| <b>Key Terms</b>  | <b>649</b> |
| <b>Review Questions</b>   | <b>649</b> |
| <br>  |            |
| <b>GLOSSARY</b>   | <b>653</b> |
| <br>  |            |
| <b>INDEX</b>  | <b>672</b> |

The Premium Website can be found at [cengage.com/mis/corone1](http://cengage.com/mis/corone1). Locate your premium access card in the front of each new book purchase, and click "Create My Account" to begin the registration process. If you've purchased a used book, please search for *Database Systems, Ninth Edition* at [www.ichapters.com](http://www.ichapters.com) where you can purchase instant access.

|   |   |
|---|---|
| <b>APPENDIX A</b>                                 | <b>DESIGNING DATABASES WITH VISIO PROFESSIONAL: A TUTORIAL</b>                                |
| <b>APPENDIX B</b>                                 | <b>THE UNIVERSITY LAB: CONCEPTUAL DESIGN</b>  |
| <b>APPENDIX C</b>                                 | <b>THE UNIVERSITY LAB: CONCEPTUAL DESIGN VERIFICATION, LOGICAL DESIGN, AND IMPLEMENTATION</b> |
| <b>APPENDIX D</b>                                 | <b>CONVERTING AN ER MODEL INTO A DATABASE STRUCTURE</b>                                       |
| <b>APPENDIX E</b>                                 | <b>COMPARISON OF ER MODEL NOTATIONS</b>   |
| <b>APPENDIX F</b>                                 | <b>CLIENT/SERVER SYSTEMS</b>  |
| <b>APPENDIX G</b>                                 | <b>OBJECT-ORIENTED DATABASES</b>  |
| <b>APPENDIX H</b>                                 | <b>UNIFIED MODELING LANGUAGE (UML)</b>  |
| <b>APPENDIX I</b>                                 | <b>DATABASES IN ELECTRONIC COMMERCE</b>   |
| <b>APPENDIX J</b>                                 | <b>WEB DATABASE DEVELOPMENT WITH COLDFUSION</b>   |
| <b>APPENDIX K</b>                                 | <b>THE HIERARCHICAL DATABASE MODEL</b>  |
| <b>APPENDIX L</b>                                 | <b>THE NETWORK DATABASE MODEL</b>   |
| <b>APPENDIX M</b>                                 | <b>MICROSOFT® ACCESS® TUTORIAL</b>  |
| <b>APPENDIX N</b>                                 | <b>CREATING A NEW DATABASE WITH ORACLE 11G</b>  |
| <br>  |   |
| <b>ANSWERS TO SELECTED QUESTIONS AND PROBLEMS</b> |   |

| <b>CHAPTER 4 ENTITY RELATIONSHIP (ER) MODELING</b> | <b>99</b> |
|--|-----------|

|  |            |
|--|------------|
| <b>4.1 The Entity Relationship Model (ERM)</b> | <b>100</b> |
|--|------------|

|                |     |
|----------------|-----|
| 4.1.1 Entities | 100 |
|----------------|-----|

|                  |     |
|------------------|-----|
| 4.1.2 Attributes | 101 |
|------------------|-----|

|                     |     |
|---------------------|-----|
| 4.1.3 Relationships | 105 |
|---------------------|-----|

|                                    |     |
|------------------------------------|-----|
| 4.1.4 Connectivity and Cardinality | 107 |
|------------------------------------|-----|

|                            |     |
|----------------------------|-----|
| 4.1.5 Existence Dependence | 108 |
|----------------------------|-----|

|                             |     |
|-----------------------------|-----|
| 4.1.6 Relationship Strength | 108 |
|-----------------------------|-----|

|                     |     |
|---------------------|-----|
| 4.1.7 Weak Entities | 110 |
|---------------------|-----|

|                                  |     |
|----------------------------------|-----|
| 4.1.8 Relationship Participation | 113 |
|----------------------------------|-----|

|                           |     |
|---------------------------|-----|
| 4.1.9 Relationship Degree | 116 |
|---------------------------|-----|

|                                |     |
|--------------------------------|-----|
| 4.1.10 Recursive Relationships | 117 |
|--------------------------------|-----|

|   |     |
|---|-----|
| 4.1.11 Associative (Composite) Entities | 121 |
|---|-----|

|                                     |            |

# TABLE OF CONTENTS

|                  |  |            |
|------------------|--|------------|
| <b>CHAPTER 5</b> | <b>ADVANCED DATA MODELING</b>                            | <b>147</b> |
| <b>5.1</b>       | <b>The Extended Entity Relationship Model</b>            | <b>148</b> |
| 5.1.1            | Entity Supertypes and Subtypes                           | 148        |
| 5.1.2            | Specialization Hierarchy                                 | 149        |
| 5.1.3            | Inheritance  | 150        |
| 5.1.4            | Subtype Discriminator                                    | 151        |
| 5.1.5            | Disjoint and Overlapping Constraints                     | 151        |
| 5.1.6            | Completeness Constraint                                  | 153        |
| 5.1.7            | Specialization and Generalization                        | 154        |
| <b>5.2</b>       | <b>Entity Clustering</b>                                 | <b>154</b> |
| <b>5.3</b>       | <b>Entity Integrity: Selecting Primary Keys</b>          | <b>155</b> |
| 5.3.1            | Natural Keys and Primary Keys                            | 156        |
| 5.3.2            | Primary Key Guidelines                                   | 156        |
| 5.3.3            | When to Use Composite Primary Keys                       | 157        |
| 5.3.4            | When to Use Surrogate Primary Keys                       | 158        |
| <b>5.4</b>       | <b>Design Cases: Learning Flexible Database Design</b>   | <b>159</b> |
| 5.4.1            | Design Case #1: Implementing 1:1 Relationships           | 160        |
| 5.4.2            | Design Case #2: Maintaining History of Time-Variant Data | 161        |
| 5.4.3            | Design Case #3: Fan Traps                                | 162        |
| 5.4.4            | Design Case #4: Redundant Relationships                  | 164        |
|                  | <b>Summary</b>   | <b>165</b> |
|                  | <b>Key Terms</b>   | <b>165</b> |
|                  | <b>Review Questions</b>                                  | <b>166</b> |
|                  | <b>Problems</b>  | <b>167</b> |
|                  | <b>Cases</b>   | <b>168</b> |
| <br>             |  |            |
| <b>CHAPTER 6</b> | <b>NORMALIZATION OF DATABASE TABLES</b>                  | <b>174</b> |
| <b>6.1</b>       | <b>Database Tables and Normalization</b>                 | <b>175</b> |
| <b>6.2</b>       | <b>The Need for Normalization</b>                        | <b>175</b> |
| <b>6.3</b>       | <b>The Normalization Process</b>                         | <b>179</b> |
| 6.3.1            | Conversion to First Normal Form                          | 181        |
| 6.3.2            | Conversion to Second Normal Form                         | 184        |
| 6.3.3            | Conversion to Third Normal Form                          | 185        |
