PREFACE xv

1 Engineering Ethics: Making the Case 1

- The *Challenger* Disaster 1
- Water Restoration in Sarajevo 3
- Hurricane Katrina 4
- 1.1 Introduction 5
- 1.2 Engineering and Ethics 6
- 1.3 Getting Started 9
- 1.4 Codes of Ethics 11
- 1.5 Engineering as a Profession 12
- 1.6 Ethics: Prohibitive, Preventive, and Aspirational 14
- 1.7 Aspirational Ethics and Professional Character:
The Good Engineer 18
- 1.8 Cases, Cases, Cases 20
- 1.9 Chapter Summary 21
- 1.10 Engineering Ethics on the Web 21

2 A Practical Ethics Toolkit 24

- 2.1 Introduction 25
- 2.2 Determining the Facts 25
- 2.3 Clarifying Concepts 26
- 2.4 Determining how Concepts Apply: Application Issues 27
- 2.5 Deciding Moral Issues: Line Drawing 27
- 2.6 Conflicting Values: Creative Middle Way Solutions 29
- 2.7 Common Morality 31
 - Formulations of Common Morality: Virtues 31
 - Formulations of Common Morality: Rules and Duties 32
 - Evaluating Actions vs. Evaluating the Person 33

2.8	The Structure of Common Morality	34
	Judgments in Common Morality	34
	Levels of Common Morality	34
2.9	Modeling Common Morality	35
	Modeling in Ethics	35
	Two Models of Common Morality	35
	Limitations of the Two Models	36
	Convergence and Divergence of the Two Models	37
2.10	Tests or Application Procedures for Using the Two Models	38
	Utilitarian Thinking	38
	Respect for Persons Approach	43
	The Self-Defeating Approach	45
	The Rights Approach	47
2.11	Chapter Summary	48
2.12	Engineering Ethics on the Web	49
3	Responsibility in Engineering	51
3.1	Introduction	52
3.2	Engineering Standards	53
3.3	The Standard of Care	54
3.4	Responsible Oversight	56
3.5	Blame-Responsibility and Causation	57
3.6	Liability	59
3.7	Good Works	61
3.8	Applications: A Case Study	64
3.9	Design Standards	66
3.10	The Range of Standards of Practice	67
3.11	The Problem of Many Hands	68
3.12	Chapter Summary	69
3.13	Engineering Ethics on the Web	70
4	The Social and Value Dimensions of Technology	72
4.1	Technology is Socially Embedded	73
4.2	Technology Affects Society	74
4.3	Society Affects Technology	75
4.4	Technology and Social Policy: Privacy	76
4.5	Technology and Public Policy: Intellectual Property	77
	Should Software Be Protected?	77
	How Should Software Be Protected?	78
4.6	Evaluating Technology: Technological Determinism and Technological Optimism	80

4.7	Evaluating Technology: Technological Pessimism	82
	Technology as a Threat to Freedom	82
	Technology and Decline of Meaning	83
4.8	A Critical Attitude Toward Technology	85
	Democratic Deliberation on Technology	85
	The Critical Attitude in Design	86
4.9	Chapter Summary	87
4.10	Engineering Ethics on the Web	88
5	Trust and Reliability	90
5.1	Introduction	91
5.2	Honesty	91
5.3	Forms of Dishonesty	92
	Lying	92
	Deliberate Deception	92
	Withholding Information	92
	Failure to Seek Out the Truth	93
5.4	Why is Dishonesty Wrong?	93
5.5	Dishonesty on Campus	95
5.6	Dishonesty in Research and Testing	96
5.7	Confidentiality	97
5.8	Intellectual Property	99
5.9	Expert Witnessing	100
5.10	Informing the Public	101
5.11	Conflicts of Interest	103
5.12	Chapter Summary	105
5.13	Engineering Ethics on the Web	106
6	Risk and Liability in Engineering	107
6.1	Introduction	108
6.2	The Engineer's Approach to Risk	110
	Risk as the Product of the Probability and Magnitude of Harm	110
	One Engineering Approach to Defining Acceptable Risk	111
	Expanding the Engineering Account of Risk: The Capabilities Approach to Identifying Harm and Benefit	113
6.3	The Public's Approach to Risk	115
	Expert and Layperson: Differences in Factual Beliefs	115
	"Risky" Situations and Acceptable Risk	116
	Free and Informed Consent	117
	Equity or Justice	118

6.4	Communicating Risk and Public Policy	119
	Communicating Risk to the Public	119
	An Example of Public Policy: Building Codes	121
6.5	Difficulties in Determining the Causes and Likelihood of Harm; The Critical Attitude	122
	Limitations in Identifying Failure Modes	123
	Limitations due to Tight Coupling and Complex Interactions	126
	Normalizing Deviance and Self-Deception	128
6.6	The Engineer's Liability for Risk	129
	The Standards of Tort Law	130
	Protecting Engineers from Liability	131
6.7	Becoming a Responsible Engineer Regarding Risk	132
6.8	Chapter Summary	134
6.9	Engineering Ethics on the Web	135
7	Engineers in Organizations	138
7.1	Introduction	139
	Ray Anderson and Interface	140
7.2	Avoiding Blind Spots	140
7.3	Autonomy and Authority	143
7.4	Groupthink	144
7.5	Engineers and Managers	146
7.6	Being Morally Responsible in an Organization	148
	The importance of Organizational Culture	148
	Three Types of Organizational Culture	148
	Acting Ethically without Having to Make Difficult Choices	150
7.7	Proper Engineering and Management Decisions	151
	Functions of Engineers and Managers	151
	Paradigmatic and Nonparadigmatic Examples	153
7.8	Responsible Organizational Disobedience	155
	Disobedience by Contrary Action	156
	Disobedience by Nonparticipation	157
7.9	Disobedience By Protest	158
	Richard Nixon v. Ernest Fitzgerald	158
	What Is Whistleblowing?	159
	Whistleblowing: A Harm-Preventing Justification	159
	Whistleblowing: A Complicity-Avoiding View	160
	Some Practical Advice on Whistleblowing	162
7.10	Employee and Employer	162
	Analysis of Lorenz Case	163

7.11	Roger Boisjoly and the <i>Challenger</i> Disaster	164
	Proper Management and Engineering Decisions	164
	Whistleblowing and Organizational Loyalty	167
7.12	Chapter Summary	168
7.13	Engineering Ethics on the Web	169
8	Engineers and the Environment	173
8.1	Introduction	174
8.2	Environmental Imperatives in Engineering Codes and the Law	174
8.3	The Environmental Challenge	175
	Three Influential Writers	176
	Key Environmental Concepts	176
8.4	Responding to the Environmental Challenge: The Business Response	178
	Three Attitudes toward the Environment	178
	An Example of the Progressive Attitude: The CERES Principles	179
8.5	Responding to the Environmental Challenge: Sustainability	180
	What Is Sustainability?	180
	Life Cycle Analysis	181
8.6	Environmental Stewardship and Engineering Professionalism and Ethics	182
	A Philosophy of Environmental Stewardship	182
	Environmental Stewardship and Professional Obligations	183
8.7	Chapter Summary	184
8.8	Engineering Ethics on the Web	185
9	Engineering in the Global Context	187
9.1	Introduction	188
9.2	The Emergence of International Engineering Standards	188
9.3	An International Concept of Engineering Professionalism?	189
9.4	Toward Global Standards of Conduct for Engineers	192
9.5	Ethical Resources for Globalized Engineering	193
	Creative Middle Ways	193
	The Golden Rule	193
	Universal Human Rights	194
	Promoting Basic Human Well-Being	195
	Codes of Engineering Societies	196
9.6	Economic Underdevelopment: The Problem of Exploitation	196
9.7	Paying for Special Treatment: The Problem of Bribery	197

9.8	Paying for Deserved Services: The Problem of Extortion and Grease Payments	198
	Extortion	198
	Grease Payments	200
9.9	The Extended Family Unit: The Problem of Nepotism	200
9.10	Business and Friendship: The Problem of Excessive Gifts	201
9.11	The Absence of Technical-Scientific Sophistication: The Problem of Paternalism	202
9.12	Differing Business Practices: The Problem of Negotiating Taxes	204
9.13	Chapter Summary	204
9.14	Engineering Ethics on the Web	205
	CASES	207
	LIST OF CASES	209
	TAXONOMY OF CASES	210
	APPENDIX Codes of Ethics	286
	BIBLIOGRAPHY	295
	INDEX	304
