

4th edition

Essentials of Business Statistics

Bowerman O'Connell Murphree Orris

Table of Contents

Chapter 1

An Introduction to Business Statistics

- 1.1 ■ Data 3
- 1.2 ■ Data Sources 5
- 1.3 ■ Populations and Samples 7
- 1.4 ■ Three Case Studies That Illustrate Sampling and Statistical Inference 8
- 1.5 ■ Ratio, Interval, Ordinal, and Nominative Scales of Measurement (Optional) 14
- App 1.1 ■ Getting Started with Excel 18
- App 1.2 ■ Getting Started with MegaStat 23
- App 1.3 ■ Getting Started with MINITAB 27

Chapter 2

Descriptive Statistics: Tabular and Graphical Methods

- 2.1 ■ Graphically Summarizing Qualitative Data 35
- 2.2 ■ Graphically Summarizing Quantitative Data 42
- 2.3 ■ Dot Plots 54
- 2.4 ■ Stem-and-Leaf Displays 56
- 2.5 ■ Cross-tabulation Tables (Optional) 61
- 2.6 ■ Scatter Plots (Optional) 67
- 2.7 ■ Misleading Graphs and Charts (Optional) 70
- App 2.1 ■ Tabular and Graphical Methods Using Excel 80
- App 2.2 ■ Tabular and Graphical Methods Using MegaStat 88
- App 2.3 ■ Tabular and Graphical Methods Using MINITAB 92

Chapter 3

Descriptive Statistics: Numerical Methods

- 3.1 ■ Describing Central Tendency 101
- 3.2 ■ Measures of Variation 110
- 3.3 ■ Percentiles, Quartiles, and Box-and-Whiskers Displays 120
- 3.4 ■ Covariance, Correlation, and the Least Squares Line (Optional) 129
- 3.5 ■ Weighted Means and Grouped Data (Optional) 134

- 3.6 ■ The Geometric Mean (Optional) 139

- App 3.1 ■ Numerical Descriptive Statistics Using Excel 146
- App 3.2 ■ Numerical Descriptive Statistics Using MegaStat 149
- App 3.3 ■ Numerical Descriptive Statistics Using MINITAB 151

Chapter 4

Probability

- 4.1 ■ The Concept of Probability 155
- 4.2 ■ Sample Spaces and Events 157
- 4.3 ■ Some Elementary Probability Rules 163
- 4.4 ■ Conditional Probability and Independence 169
- 4.5 ■ Bayes' Theorem (Optional) 178
- 4.6 ■ Counting Rules (Optional) 182

Chapter 5

Discrete Random Variables

- 5.1 ■ Two Types of Random Variables 191
- 5.2 ■ Discrete Probability Distributions 192
- 5.3 ■ The Binomial Distribution 203
- 5.4 ■ The Poisson Distribution (Optional) 213
- 5.5 ■ The Hypergeometric Distribution (Optional) 219
- App 5.1 ■ Binomial, Poisson, and Hypergeometric Probabilities Using Excel 224
- App 5.2 ■ Binomial, Poisson, and Hypergeometric Probabilities Using MegaStat 226
- App 5.3 ■ Binomial, Poisson, and Hypergeometric Probabilities Using MINITAB 227

Chapter 6

Continuous Random Variables

- 6.1 ■ Continuous Probability Distributions 229
- 6.2 ■ The Uniform Distribution 231
- 6.3 ■ The Normal Probability Distribution 234
- 6.4 ■ Approximating the Binomial Distribution by Using the Normal Distribution (Optional) 252
- 6.5 ■ The Exponential Distribution (Optional) 256
- 6.6 ■ The Normal Probability Plot (Optional) 259

- App 6.1 ■ Normal Distribution Using Excel 266
- App 6.2 ■ Normal Distribution Using MegaStat 267
- App 6.3 ■ Normal Distribution Using MINITAB 268

Chapter 7

Sampling and Sampling Distributions

- 7.1 ■ Random Sampling 271
- 7.2 ■ The Sampling Distribution of the Sample Mean 275
- 7.3 ■ The Sampling Distribution of the Sample Proportion 288
- 7.4 ■ Stratified Random, Cluster, and Systematic Sampling (Optional) 291
- 7.5 ■ More about Surveys and Errors in Survey Sampling (Optional) 293
- App 7.1 ■ Generating Random Numbers Using Excel 301
- App 7.2 ■ Generating Random Numbers Using MegaStat 302
- App 7.3 ■ Generating Random Numbers and Simulating Sampling Distributions Using MINITAB 302

Chapter 8

Confidence Intervals

- 8.1 ■ z -Based Confidence Intervals for a Population Mean: σ Known 305
- 8.2 ■ t -Based Confidence Intervals for a Population Mean: σ Unknown 314
- 8.3 ■ Sample Size Determination 321
- 8.4 ■ Confidence Intervals for a Population Proportion 325
- 8.5 ■ A Comparison of Confidence Intervals and Tolerance Intervals (Optional) 332
- App 8.1 ■ Confidence Intervals Using Excel 338
- App 8.2 ■ Confidence Intervals Using MegaStat 339
- App 8.3 ■ Confidence Intervals Using MINITAB 340

Chapter 9

Hypothesis Testing

- 9.1 ■ The Null and Alternative Hypotheses and Errors in Hypothesis Testing 343
- 9.2 ■ z Tests about a Population Mean: σ Known 349
- 9.3 ■ t Tests about a Population Mean: σ Unknown 359
- 9.4 ■ z Tests about a Population Proportion 363
- 9.5 ■ Type II Error Probabilities and Sample Size Determination (Optional) 368
- 9.6 ■ The Chi-Square Distribution (Optional) 374

- 9.7 ■ Statistical Inference for a Population Variance (Optional) 375

- App 9.1 ■ One-Sample Hypothesis Testing Using Excel 382
- App 9.2 ■ One-Sample Hypothesis Testing Using MegaStat 383
- App 9.3 ■ One-Sample Hypothesis Testing Using MINITAB 384

Chapter 10

Statistical Inferences Based on Two Samples

- 10.1 ■ Comparing Two Population Means by Using Independent Samples 387
- 10.2 ■ Paired Difference Experiments 397
- 10.3 ■ Comparing Two Population Proportions by Using Large, Independent Samples 405
- 10.4 ■ Comparing Two Population Variances by Using Independent Samples 411
- App 10.1 ■ Two-Sample Hypothesis Testing Using Excel 422
- App 10.2 ■ Two-Sample Hypothesis Testing Using MegaStat 423
- App 10.3 ■ Two-Sample Hypothesis Testing Using MINITAB 425

Chapter 11

Experimental Design and Analysis of Variance

- 11.1 ■ Basic Concepts of Experimental Design 429
- 11.2 ■ One-Way Analysis of Variance 431
- 11.3 ■ The Randomized Block Design 441
- 11.4 ■ Two-Way Analysis of Variance 447
- App 11.1 ■ Experimental Design and Analysis of Variance Using Excel 457
- App 11.2 ■ Experimental Design and Analysis of Variance Using MegaStat 458
- App 11.3 ■ Experimental Design and Analysis of Variance Using MINITAB 460

Chapter 12

Chi-Square Tests

- 12.1 ■ Chi-Square Goodness-of-Fit Tests 463
- 12.2 ■ A Chi-Square Test for Independence 472
- App 12.1 ■ Chi-Square Tests Using Excel 483
- App 12.2 ■ Chi-Square Tests Using MegaStat 485
- App 12.3 ■ Chi-Square Tests Using MINITAB 487

Chapter 13

Simple Linear Regression Analysis

- 13.1 ■ The Simple Linear Regression Model and the Least Squares Point Estimates 491

13.2 ■ Model Assumptions and the Standard Error	504
13.3 ■ Testing the Significance of the Slope and y-Intercept	507
13.4 ■ Confidence and Prediction Intervals	514
13.5 ■ Simple Coefficients of Determination and Correlation	520
13.6 ■ Testing the Significance of the Population Correlation Coefficient	525
13.7 ■ An F Test for the Model	526
13.8 ■ The QHIC Case	529
13.9 ■ Residual Analysis	531
13.10 ■ Some Shortcut Formulas (Optional)	546
App 13.1 ■ Simple Linear Regression Analysis Using Excel	552
App 13.2 ■ Simple Linear Regression Analysis Using MegaStat	554
App 13.3 ■ Simple Linear Regression Analysis Using MINITAB	556

Chapter 14

Multiple Regression and Model Building

14.1 ■ The Multiple Regression Model and the Least Squares Point Estimates	559
14.2 ■ Model Assumptions and the Standard Error	569
14.3 ■ R^2 and Adjusted R^2	571
14.4 ■ The Overall F Test	573
14.5 ■ Testing the Significance of an Independent Variable	575
14.6 ■ Confidence and Prediction Intervals	579
14.7 ■ The Sales Territory Performance Case	582
14.8 ■ Using Dummy Variables to Model Qualitative Independent Variables	584
14.9 ■ Using Squared and Interaction Variables	596

14.10 ■ Model Building and the Effects of Multicollinearity	601
14.11 ■ Residual Analysis in Multiple Regression	610
App 14.1 ■ Multiple Regression Analysis Using Excel	620
App 14.2 ■ Multiple Regression Analysis Using MegaStat	623
App 14.3 ■ Multiple Regression Analysis Using MINITAB	626

Appendix A

Statistical Tables	630
--------------------	-----

Answers to Most Odd-Numbered Exercises	651
References	657
Photo Credits	659
Index	660

Chapter 15	On Website
Process Improvement Using Control Charts	

Appendix B	On Website
Properties of the Mean and the Variance of a Random Variable, and the Covariance	

Appendix C	On Website
Derivations of the Mean and Variance of \bar{x} and \hat{p}	

Appendix D	On Website
Confidence Intervals for Parameters of Finite Populations	

Appendix E	On Website
Logistic Regression
