<i>List of Figures and Tables</i>	ix
<i>Preface</i>	x
<i>Acknowledgments</i>	xii
1 When Should We Trust What We Know? Why Research Methods?	1
Time-Based Knowing: Traditional Knowledge	3
Credential-Based Knowing: Authoritative Knowledge	4
More Risky Knowledge Sources: Common Sense and Intuition	8
Science as a Trustworthy Way of Knowing	9
Goals of Research	11
Using Research Methods to Become Critical Consumers of Information	13
2 Ethics: It's the Right Thing To Do	16
Research Should Not Cause Harm to Subjects	17
Researchers Should Obtain the Informed Consent of Subjects	19
Researchers Should Respect Subjects' Privacy	22
Researchers Should Avoid Conflicts of Interest	26
Ethical Reporting: The Whole Truth and Nothing but the Truth?	27
Reinforcing the Ethical Route: Institutional Review Boards	28
Ethical Fusion	29
3 Some Perfectly Valid Points: Measurement, Internal, and External Validity	32
Measurement Validity	33
Internal Validity	38

External Validity	41
Conclusions	45
<b>4 Measure By Measure: Making the Abstract Concrete</b>	<b>47</b>
Concepts and the Research Process	48
Bringing Theory Down to Earth	49
Conceptualization	50
Operationalization	51
Levels of Measurement	52
Operational Definitions	57
Conclusion	59
<b>5 If It Glitters Is It Gold? Assessing Measures</b>	<b>62</b>
Facing Off Our Measures	62
Content Validity	63
Criterion Validity	64
Construct Validity	66
Reliability Checks	67
Testing, Testing, Testing for Reliability	67
Multiple-Forms	68
Split-Half Technique	69
Noise and Bias	70
Measuring Up and Out	73
<b>6 One Thing Leads to Another: Causal Analysis</b>	<b>75</b>
Causal Models: Nomothetic and Idiographic	76
Causal Requirements	78
Causal Analysis and Research Design	82
Causal Analysis and Survey Research	86
Causality and Field Research	88
Conclusions	90
<b>7 Designing Ideas: Research Strategies</b>	<b>92</b>
It's All in the Timing	92
Cross-Sectional Research Designs	93
Longitudinal Research Designs	94
Units of Analysis	99
Conclusions	102

---

8	An Informative Few: Sampling	104
	Obstacles to Representative Samples	106
	A Representative Sample: Take a Chance	109
	Non-Probability Techniques	116
	Estimating Sampling Error	118
	Just a Sampling of the Issues	120
9	Our Inquisitive Nature: The Questionnaire	123
	The Way We Word	126
	The Structure of Questions: Closed- and Open-Ended Questions	130
	Putting It Together	134
	Pre-Testing	141
	Return to Sender: The Special Challenge of the Mailed Questionnaire	141
	Delivering Questions Electronically	143
	Ask and You Shall Receive	143
10	Talking Heads: The Interview	146
	Conversational Exchange	147
	Developing an Unstructured Guide	151
	The Interview Schedule	154
	Covering Sensitive Topics	155
	Phone Home	155
	The More the Merrier: Focus Groups	157
	Training Issues	159
	Tools of the Trade	161
	The Final Word	162
11	Watch and Learn: Field Research	164
	Location, Location, Location ... and More	165
	Fieldwork Tasks	167
	Informal Interviews	169
	Notes	169
	Files	172
	The Validity of Field Research	174
12	Getting Organized: Descriptive Statistics	177
	How Did We Get to this Point?	177
	Getting Organized	179
	Summarizing Descriptions	179

Picture This	187
SPSS (Statistical Package for the Social Sciences)	194
<b>13 Beyond Description: Inferential Statistics</b>	<b>198</b>
The Normal Curve	198
Repeat After Me	202
The Sampling Distribution	203
Putting It Together	204
Some Concrete Examples	207
Bringing It Home	208
<i>References</i>	211
<i>Web Resources</i>	219
<i>Index</i>	231
