

Food labelling

Edited by
J. Ralph Blanchfield, MBE

Contents

Editor's foreword	xi
List of contributors	xv
1 Introduction	1
1.1 Key issues in food labelling <i>D. Jukes, University of Reading</i>	1
1.2 Consumer needs <i>C. Bruhn, Center for Consumer Research, University of California</i>	5
1.3 Manufacturers' needs <i>M. Hunt, Food and Drink Federation, London</i>	13
1.4 Legislators' perspectives <i>D. A. Love, formerly MAFF, London</i>	19
1.5 An enforcement perspective <i>D. Walker, Trading Standards, Shropshire County Council, Shrewsbury</i>	22
2 Labelling requirements: European Union <i>D. A. Love, formerly MAFF, London</i>	31
2.1 Key principles	31
2.2 The organisation of EU legislation	32
2.3 EU legislation and Codex standards	33
2.4 The main requirements for prepacked foods	34
2.5 Nutrition labelling and claims	37
2.6 Specific labelling requirements in food composition Directives	39
2.7 Specific labelling requirements in CAP marketing regulations	40
2.8 Novel foods and genetically modified foods: labelling rules	41
2.9 Future developments	43
2.10 References and sources of further information	44
Appendix: Comparison of Codex and UK claims criteria	45

3 Labeling requirements: United States	49
<i>J. Vanderveen (Center for Food Safety and Applied Nutrition, Food and Drug Administration, Washington DC) and E. J. Campbell (AAC Group, Bethesda)</i>	
3.1 Introduction	49
3.2 The legislative and rule-making process	50
3.3 The main enforcement agencies	52
3.4 Regulations on product name	52
3.5 Ingredients	53
3.6 Responsible agent for product	54
3.7 Net contents labeling	54
3.8 Nutrition facts	55
3.9 Country of origin	56
3.10 Nutrition content claims	56
3.11 Health claims	57
3.12 Details of regulations by competent authorities	63
3.13 Future trends	63
3.14 References	64
4 Declaration of ingredients and additives: European Union	65
<i>D. W. Flowerdew, Consultant (formerly Leatherhead Food Research Association)</i>	
4.1 Declaring ingredients and additives: the basic principles	65
4.2 Review of key legislation	66
4.3 Future trends in labelling requirements for ingredients and additives	76
4.4 Summary of manufacturers' responsibilities	76
4.5 How it can go wrong	77
4.6 References	78
5 Declaration of ingredients and additives: United States	81
<i>R. H. Schmidt, University of Florida</i>	
5.1 Declaring ingredients and additives: the basic principles	81
5.2 Review of key legislation	82
5.3 Manufacturers' responsibilities for ingredient and additive declaration	85
5.4 References	100
6 Durability indication: European Union	101
<i>A. Mröhs, Bund für Lebensmittelrecht und Lebensmittelkunde e.V., Bonn</i>	
6.1 Introduction	101
6.2 The legal situation	102
6.3 Manufacturers' responsibilities	104
6.4 The product on its way to the consumer	104
6.5 Varied application in the EU	105
6.6 Special provision for short-life products: introduction	105

6.7	The legal situation: use-by date	105
6.8	Products with use-by date on their way to the consumer	106
6.9	Varied interpretations of 'use-by' provisions in EU Member States ..	106
6.10	Guidelines on how dates should be calculated and presented	106
6.11	Future trends	107
6.12	Sources of further information and advice	107
6.13	References	109
7	Durability indication: United States	111
	<i>R. A. LaBudde, North Carolina State University and Least Cost Formulations, Ltd</i>	
7.1	Introduction	111
7.2	History	111
7.3	Terminology	112
7.4	Conflicting purposes of durability indications	112
7.5	Cost of durability indications	114
7.6	Guidelines for durability indications	118
7.7	Telltale indicators	119
7.8	Future trends	119
7.9	Summary	121
7.10	Sources of further information and advice	121
7.11	References	122
8	Nutrition information: European Union	125
	<i>L. Insall, Food and Drink Federation, London</i>	
8.1	Introduction: key issues in presenting nutrition information	125
8.2	EU nutrition legislation	127
8.3	Manufacturers' responsibilities	132
8.4	Consumer expectations	133
8.5	Voluntary codes	139
8.6	Future trends	142
8.7	Sources of further information and advice	145
8.8	References	145
8.9	Further reading	146
9	Nutrition information: United States	147
	<i>T. A. Altman, Professional Fluency, Chicago</i>	
9.1	Key principles of US labeling requirements	147
9.2	Making nutrient declarations	150
9.3	Format requirements and exemptions: conventional foods	156
9.4	Dietary supplement labeling	159
9.5	Compliance management	162
9.6	Future trends	163
9.7	Additional information sources	164

10 Nutrition and health claims: European Union	165
<i>P. Berry Ottaway, Consultant</i>	
10.1 Introduction	165
10.2 Nutrition and health claims in the EU	166
10.3 Substantiation of health claims	174
10.4 Nutrition labelling	175
10.5 The future	175
10.7 References	176
11 Nutrition and health claims: United States	179
<i>M. K. Schmidl and T. P. Labuza, University of Minnesota</i>	
11.1 Introduction	179
11.2 Definitions	180
11.3 Disease-specific claims or disease-prevention claims	185
11.4 FDA Modernization Act of 1997	192
11.5 Medical foods	193
11.6 Dietary Supplement Health and Education Act of 1994	194
11.7 Controversy over labeling	200
11.8 Advertising and the Federal Trade Commission (FTC)	201
11.9 The future	202
11.10 Further reading	202
11.11 References	203
12 Special issues in food labelling	205
12.1 Good design in food labelling	205
<i>E. J. Whiteley, Institute of Grocery Distribution, Watford</i>	
12.2 Multi-language requirements	211
<i>J-P. Kern, Mars Incorporated, McLean</i>	
12.3 Food allergen labelling	216
<i>J. Ralph Blanchfield, Food Science, Food Technology and Food Law Consultant</i>	
12.4 Genetically modified foods and ingredients	221
<i>M. J. Sadler, Institute of Grocery Distribution, Watford</i>	
12.5 Irradiated foods and ingredients	225
<i>G. W. Gould, Food Science, Food Technology and Food Law Consultant</i>	
12.6 Label problems for blind and visually impaired people	233
<i>J. Ralph Blanchfield, Food Science, Food Technology and Food Law Consultant</i>	
13 Determining shelf-life	237
<i>C. M. D. Man, South Bank University, London</i>	
13.1 What do we mean by 'shelf-life'?	237
13.2 Introducing the main categories of product	242
13.3 Principal ways of determining and extending shelf-life	243

13.4	Future trends	249
13.5	Sources of further information and advice	250
13.6	References	252
14	Instructions for storage and use	255
	<i>K. G. Anderson, Consultant and Visiting Professor, University of North London</i>	
14.1	Introduction	255
14.2	Risk categorisation	258
14.3	Clarity of language	258
14.4	Date marking (appropriate durability indication)	259
14.5	Storage and post-opening storage	260
14.6	Freezing, treatment post-freezing and re-freezing	260
14.7	Cooking and reheating	261
14.8	Microwaveable foods	261
14.9	Use in recipes	263
14.10	Special circumstances	263
14.11	Future trends	264
14.12	Sources of further information and advice	264
14.13	Bibliography	265
15	The role of traceability in food labelling	267
	<i>C. Morrison, Youngs Bluecrest Seafoods Ltd, Grimsby</i>	
15.1	The key objectives of traceability	267
15.2	Legal requirements concerning traceability coding	268
15.3	Wider aspects of traceability coding	270
15.4	A modern computerised production and management control system	271
15.5	Use of care lines on product packaging in traceability	275
15.6	Applying traceability systems when problems arise	275
15.7	Summary	276
15.8	References	280
