FORENSIC ANALYTICS

Methods and Techniques for
Forensic Accounting Investigations

MARK J. NIGRINI, PhD

Discover how to detect fraud, biases, or errors in your data using Access or Excel

Every fraud or error changes your data in some way or another. The challenge is to find those needles in the haystack. *Forensic Analytics* shows how you can use Microsoft Access and Excel as your primary interrogation tools to find exceptional, irregular, and anomalous transactions.

Forensic Analytics reveals how you can:

- Use Access, Excel, and PowerPoint in a forensic setting
- Use statistical techniques such as Benford's Law, correlation, and time-series analysis to detect fraud and errors
- Detect financial statement fraud using one of several statistical approaches
- Score divisions, locations, agents, or customers for fraud risk
- Become the data analytics expert in your organization

With over 300 images, *Forensic Analytics* reviews and shows how twenty tests can be used to detect fraud, errors, or biases in your data. For each test, the original data is shown together with the steps needed to get to the final result. The tests range from thorough overviews to assess the reasonableness of data, to highly focused tests that give small samples of highly suspicious transactions. Some tests incorporate time and changes over time while other tests look for irregular patterns, excessively large amounts, or excessive duplications. The tests are relevant to any kind or size organization, whether small or large, nonprofit, or government-related.

Preface xi

About the Author xv

Chapter 1: Using Access in Forensic Investigations	1
An Introduction to Access	2
The Architecture of Access	4
A Review of Access Tables	6
Importing Data into Access	8
A Review of Access Queries	10
Converting Excel Data into a Usable Access Format	13
Using the Access Documenter	20
Database Limit of 2 GB	24
Miscellaneous Access Notes	24
Summary	25
Chapter 2: Using Excel in Forensic Investigations	27
Pitfalls in Using Excel	28
Importing Data into Excel	30
Reporting Forensic Analytics Results	32
Protecting Excel Spreadsheets	34
Using Excel Results in Word Files	36
Excel Warnings and Indicators	40
Summary	41
Chapter 3: Using PowerPoint in Forensic Presentations	43
Overview of Forensic Presentations	44
An Overview of PowerPoint	44
Planning the Presentation	45
Color Schemes for Forensic Presentations	46
Problems with Forensic Reports	50
Summary	61

Chapter 4: High-Level Data Overview Tests	63
The Data Profile	64
The Data Histogram	67
The Periodic Graph	69
Preparing the Data Profile Using Access	70
Preparing the Data Profile Using Excel	77
Calculating the Inputs for the Periodic Graph in Access	79
Preparing a Histogram in Access Using an Interval Table	81
Summary	83
 Chapter 5: Benford's Law: The Basics	 85
An Overview of Benford's Law	86
From Theory to Application in 60 Years	89
Which Data Sets Should Conform to Benford's Law?	97
The Effect of Data Set Size	98
The Basic Digit Tests	99
Running the First-Two Digits Test in Access	102
Summary	107
 Chapter 6: Benford's Law: Assessing Conformity	 109
One Digit at a Time: The Z-Statistic	110
The Chi-Square and Kolmogorov-Smirnoff Tests	111
The Mean Absolute Deviation (MAD) Test	114
Tests Based on the Logarithmic Basis of Benford's Law	115
Creating a Perfect Synthetic Benford Set	121
The Mantissa Arc Test	122
Summary	129
 Chapter 7: Benford's Law: The Second-Order and Summation Tests	 130
A Description of the Second-Order Test	131
The Summation Test	144
Summary	151
 Chapter 8: Benford's Law: The Number Duplication and Last-Two Digits Tests	 153
The Number Duplication Test	154
Running the Number Duplication Test in Access	155

Running the Number Duplication Test in Excel	164
The Last-Two Digits Test	167
Summary	172

Chapter 9: Testing the Internal Diagnostics of Current Period and Prior Period Data **173**

A Review of Descriptive Statistics	175
An Analysis of Alumni Gifts	178
An Analysis of Fraudulent Data	182
Summary and Discussion	189

Chapter 10: Identifying Fraud Using the Largest Subsets and Largest Growth Tests **191**

Findings From the Largest Subsets Test	193
Running the Largest Subsets Test in Access	195
Running the Largest Growth Test in Access	197
Running the Largest Subsets Test in Excel	200
Running the Largest Growth Test in Excel	203
Summary	210

Chapter 11: Identifying Anomalies Using the Relative Size Factor Test **212**

Relative Size Factor Test Findings	213
Running the RSF Test	215
Running the Relative Size Factor Test in Access	216
Running the Relative Size Factor Test in Excel	226
Summary	232

Chapter 12: Identifying Fraud Using Abnormal Duplications within Subsets **233**

The Same-Same-Same Test	234
The Same-Same-Different Test	235
The Subset Number Duplication Test	236
Running the Same-Same-Same Test in Access	238
Running the Same-Same-Different Test in Access	239
Running the Subset Number Duplication Test in Access	244
Running the Same-Same-Same Test in Excel	248
Running the Same-Same-Different Test in Excel	252
