Human Genetics

ninth edition

Concepts and Applications

Ricki Lewis

Contents

- About the Author v
Preface xiii
The Human Touch xvi
Applying Human Genetics xvii
The Lewis Guided Learning System xviii

PART 1 Introduction 1

CHAPTER 1 Overview of Genetics 1

- 1.1 Introducing Genes 2
- 1.2 Levels of Genetics 4
- 1.3 Genes and Their Environment 8
- 1.4 Applications of Genetics 9

CHAPTER 2 Cells 18

- 2.1 Introducing Cells 19
- 2.2 Cell Components 19
- 2.3 Cell Division and Death 30

PART 2 Transmission Genetics 69

CHAPTER 4 Single-Gene Inheritance 69

- 4.1 A Tale of Two Families 70
- 4.2 Following the Inheritance of One Gene—Segregation 71
- 4.3 Single-Gene Inheritance in Humans 75
- 4.4 Following the Inheritance of Two Genes—Independent Assortment 79
- 4.5 Pedigree Analysis 82

- 2.4 Cell-Cell Interactions 35
- 2.5 Stem Cells 36

CHAPTER 3 Meiosis and Development 44

- 3.1 The Reproductive System 45
- 3.2 Meiosis 46
- 3.3 Gamete Maturation 49
- 3.4 Prenatal Development 52
- 3.5 Birth Defects 60
- 3.6 Maturation and Aging 62

CHAPTER 5 Beyond Mendel's Laws 90

- 5.1 A New View of Mendelian Genetics 91
- 5.2 When Gene Expression Appears to Alter Mendelian Ratios 91
- 5.3 Mitochondrial Genes 98
- 5.4 Linkage 101

CHAPTER 6

Matters of Sex 110

- 6.1 Our Sexual Selves 111
- 6.2 Traits Inherited on Sex Chromosomes 117
- 6.3 Sex-Limited and Sex-Influenced Traits 122
- 6.4 X Inactivation 123
- 6.5 Genomic Imprinting 126

CHAPTER 7

Multifactorial Traits 132

- 7.1 Genes and the Environment Mold Traits 132
- 7.2 Polygenic Traits Are Continuously Varying 134
- 7.3 Traditional Approaches to Investigating Multifactorial Traits 138
- 7.4 Genome-Wide Association Studies 143
- 7.5 A Closer Look: Body Weight 146

CHAPTER 8

Genetics of Behavior 152

- 8.1 Genes and Behavior 153
- 8.2 Eating Disorders 154
- 8.3 Sleep 155
- 8.4 Intelligence 156
- 8.5 Drug Addiction 157
- 8.6 Mood Disorders 159
- 8.7 Schizophrenia 160
- 8.8 Autism 162

PART 3 DNA and Chromosomes 168

CHAPTER 9

DNA Structure and Replication 168

- 9.1 Experiments Identify and Describe the Genetic Material 169
- 9.2 DNA Structure 172
- 9.3 DNA Replication—Maintaining Genetic Information 175

CHAPTER 10

Gene Action: From DNA to Protein 182

- 10.1 From DNA to Protein 183
- 10.2 Transcription 183
- 10.3 Translation of a Protein 188
- 10.4 Processing a Protein 194

CHAPTER 11

Gene Expression and Epigenetics 202

- 11.1 Gene Expression Through Time and Tissue 203
- 11.2 Control of Gene Expression 206
- 11.3 Maximizing Genetic Information 208
- 11.4 Most of the Human Genome Does *Not* Encode Protein 210

CHAPTER 12

Gene Mutation 214

- 12.1 The Nature of Mutation 215
- 12.2 Two Mutations 216
- 12.3 Causes of Mutation 219
- 12.4 Types of Mutations 224
- 12.5 The Importance of Position 230
- 12.6 DNA Repair 232

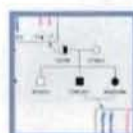

PART 4 Population Genetics 266

CHAPTER 14

Constant Allele Frequencies 266

- 14.1 Population Genetics Underlies Evolution 266
- 14.2 Constant Allele Frequencies 267
- 14.3 Applying Hardy-Weinberg Equilibrium 269
- 14.4 DNA Profiling Uses Hardy-Weinberg Assumptions 270

CHAPTER 13

Chromosomes 240

- 13.1 Portrait of a Chromosome 241
- 13.2 Visualizing Chromosomes 243
- 13.3 Abnormal Chromosome Number 248
- 13.4 Abnormal Chromosome Structure 255
- 13.5 Uniparental Disomy—A Double Dose from One Parent 261

CHAPTER 15

Changing Allele Frequencies 283

- 15.1 Nonrandom Mating 284
- 15.2 Migration 286
- 15.3 Genetic Drift 287
- 15.4 Mutation 291
- 15.5 Natural Selection 292
- 15.6 Putting It All Together: PKU Revisited 298
- 15.7 Eugenics 299

CHAPTER 16

Human Ancestry 307

- 16.1 Human Origins 308
- 16.2 Molecular Evolution 316
- 16.3 Molecular Clocks 323
- 16.4 The Peopling of the Planet 325

PART 5 Immunity and Cancer 333

CHAPTER 17

Genetics of Immunity 333

- 17.1 The Importance of Cell Surfaces 334
- 17.2 The Human Immune System 336
- 17.3 Abnormal Immunity 341
- 17.4 Altering Immunity 347
- 17.5 A Genomic View of Immunity—The Pathogen's Perspective 351

CHAPTER 18

Genetics of Cancer 355

- 18.1 Cancer Is Genetic, But Usually Not Inherited 356
- 18.2 Characteristics of Cancer Cells 358
- 18.3 Origins of Cancer Cells 361
- 18.4 Cancer Genes and MicroRNAs 363
- 18.5 Many Genes Contribute to Cancer 369
- 18.6 Environmental Causes of Cancer 371
- 18.7 The Personalization of Cancer Diagnosis and Treatment 373

PART 6 Genetic Technology 378

CHAPTER 19

Genetic Technologies: Amplifying, Modifying, and Monitoring DNA 378

- 19.1 Patenting DNA 379
- 19.2 Amplifying DNA 380
- 19.3 Modifying DNA 382
- 19.4 Monitoring Gene Function 388
- 19.5 Silencing DNA 390

CHAPTER 20

Genetic Testing and Treatment 395

- 20.1 Geneticists Find Zebras, and Some Horses 396
- 20.2 Genetic Counseling 396
- 20.3 Genetic Testing 399
- 20.4 Treating Genetic Disease 402

CHAPTER 21

Reproductive Technologies 414

- 21.1 Savior Siblings and More 415
- 21.2 Infertility and Subfertility 415
- 21.3 Assisted Reproductive Technologies 418
- 21.4 Extra Embryos 424

CHAPTER 22

Genomics 430

- 22.1 From Genetics to Genomics 431
- 22.2 DNA Sequencing and Genome Synthesis 436
- 22.3 Ways of Looking at Genomes 439
- 22.4 Personal Genome Sequencing 443

Glossary G-1
