

Human Physiology

From Cells to Systems

Lauralee Sherwood

Department of Physiology and Pharmacology
School of Medicine
West Virginia University

160

	PERPUSTAKAAN Universitas Katolik Soegijapranata
No. Inv.	00162 - Kdt - 18
Tanggal	24 - 9 - 2018
Paraf	<i>[Signature]</i>

Brief Contents

Chapter 1

Introduction to Physiology and Homeostasis 1

Chapter 2

Cell Physiology 21

Chapter 3

The Plasma Membrane and Membrane Potential 55

Chapter 4

Principles of Neural and Hormonal Communication 87

Chapter 5

The Central Nervous System 133

Chapter 6

The Peripheral Nervous System: Afferent Division; Special Senses 181

Chapter 7

The Peripheral Nervous System: Efferent Division 233

Chapter 8

Muscle Physiology 251

Chapter 9

Cardiac Physiology 297

Chapter 10

The Blood Vessels and Blood Pressure 335

Chapter 11

The Blood 380

Chapter 12

Body Defenses 404

Chapter 13

The Respiratory System 445

Chapter 14

The Urinary System 491

Chapter 15

Fluid and Acid–Base Balance 535

Chapter 16

The Digestive System 565

Chapter 17

Energy Balance and Temperature Regulation 618

Chapter 18

Principles of Endocrinology; The Central Endocrine Glands 638

Chapter 19

The Peripheral Endocrine Glands 665

Chapter 20

The Reproductive System 715
