PREFACE xv

ABOUT THE AUTHORS xxiii

1 Introduction, Acquiring Knowledge, and the Scientific Method 1

Learning Objectives 1

Chapter Overview 1

Chapter Preview 2

1.1 Introduction to Research Methodology 3

Why Take a Research Methods Course? 3

1.2 Methods of Knowing and Acquiring Knowledge 4

The Method of Tenacity 5

The Method of Intuition 6

The Method of Authority 6

The Rational Method 9

The Empirical Method 12

Summary 14

1.3 The Scientific Method 15

The Steps of the Scientific Method 16

Other Elements of the Scientific Method 20

Science versus Pseudoscience 23

1.4 The Research Process 25

Quantitative and Qualitative Research 25

The Steps in the Research Process 26

Step 1: Find a Research Idea: Select a Topic and Search the Literature to
Find an Unanswered Question 28

Step 2: Form a Hypothesis 29

Step 3: Determine How You Will Define and Measure Your Variables 29

Step 4: Identify the Participants or Subjects for the Study, Decide How
They Will be Selected, and Plan for Their Ethical Treatment 30

Step 5: Select a Research Strategy 31

Step 6: Select a Research Design 31

Step 7: Conduct the Study	31
Step 8: Evaluate the Data	32
Step 9: Report the Results	32
Step 10: Refine or Reformulate Your Research Idea	32
Chapter Summary	33
Key Words	34
Exercises	34
Engagement Activities	35
Learning Check Answers	36

2 Research Ideas and Hypotheses 37

Learning Objectives	37
Chapter Overview	37
Chapter Preview	38

- 2.1** Getting Started 39
- Pick a Topic in Which You Are Interested 39
 - Do Your Homework 39
 - Keep an Open Mind 40
 - Focus, Focus, Focus 40
 - Take One Step at a Time 41
- 2.2** Sources of Research Ideas 41
- Common Sources of Research Topics 41
- 2.3** Finding Background Literature: Conducting a Literature Search 43
- Primary and Secondary Sources 44
 - The Purpose of a Literature Search 46
 - Preparing for a Literature Search 48
 - Using Online Databases 49
 - Using PsycINFO 51
 - Screening Articles During a Literature Search 51
 - Ending a Literature Search 52
- 2.4** Finding an Idea for a Research Study from a Published Research Article 53
- Find Suggestions for Future Research 53
 - Combine or Contrast Existing Results 53
 - The Components of a Research Article—Critical Reading 54

2.5 Using a Research Idea to Form a Hypothesis and Create a Research Study 56

Characteristics of a Good Hypothesis	57
Using a Hypothesis to Create a Research Study	60
Chapter Summary	61
Key Words	61
Exercises	61
Engagement Activities	62
Learning Check Answers	62

3 Defining and Measuring Variables 63

Learning Objectives	63
Chapter Overview	63
Chapter Preview	64

- 3.1** An Introduction to Measurement 64
- 3.2** Constructs and Operational Definitions 66
- Theories and Constructs 67
 - Operational Definitions 67
 - Limitations of Operational Definitions 68
 - Using Operational Definitions 69
- 3.3** Validity and Reliability of Measurement 70
- Consistency of a Relationship 70
 - Validity of Measurement 72
 - Reliability of Measurement 76
 - The Relationship Between Reliability and Validity 79
- 3.4** Scales of Measurement 80
- The Nominal Scale 81
 - The Ordinal Scale 81
 - Interval and Ratio Scales 81
 - Selecting a Scale of Measurement 84
- 3.5** Modalities of Measurement 85
- Self-Report Measures 86
 - Physiological Measures 86
 - Behavioral Measures 87
- 3.6** Other Aspects of Measurement 88
- Multiple Measures 88

Sensitivity and Range Effects 89
Artifacts: Experimenter Bias and Participant Reactivity 90
Selecting a Measurement Procedure 94

Chapter Summary 95

Key Words 95

Exercises 96

Engagement Activities 97

Learning Check Answers 98

4 Ethics in Research 99

Learning Objectives 99

Chapter Overview 99

Chapter Preview 100

4.1 Introduction 101

Ethical Concerns Throughout the Research Process 101
The Basic Categories of Ethical Responsibility 102

4.2 Ethical Issues and Human Participants in Research 102

Historical Highlights of Treatment of Human Participants 103
American Psychological Association Guidelines 105
The Institutional Review Board 116

4.3 Ethical Issues and Nonhuman Subjects in Research 119

Historical Highlights of Treatment of Nonhuman Subjects 120
American Psychological Association Guidelines 120
The Institutional Animal Care and Use Committee 121

4.4 Ethical Issues and Scientific Integrity 122

Fraud in Science 123
Plagiarism 124

Chapter Summary 127

Key Words 127

Exercises 128

Engagement Activities 128

Learning Check Answers 129

5 Selecting Research Participants 131

Learning Objectives 131

Chapter Overview 131

Chapter Preview 132

5.1 Introduction to Sampling 133

Populations and Samples 133
Representative Samples 135
Sample Size 136
Sampling Basics 138

5.2 Probability Sampling Methods 140

Simple Random Sampling 140
Systematic Sampling 142
Stratified Random Sampling 142
Proportionate Stratified Random Sampling 144
Cluster Sampling 145
Combined-Strategy Sampling 145
A Summary of Probability Sampling Methods 145

5.3 Nonprobability Sampling Methods 146

Convenience Sampling 147
Quota Sampling 148

Chapter Summary 150

Key Words 150

Exercises 151

Engagement Activities 152

Learning Check Answers 152

6 Research Strategies and Validity 153

Learning Objectives 153

Chapter Overview 153

Chapter Preview 154

6.1 Research Strategies 155

The Descriptive Research Strategy 156
Relationships Between Variables 156
The Correlational Research Strategy: Measuring Two Variables for Each Individual 157

- Comparing Two or More Sets of Scores: The Experimental, Quasi-Experimental, and Nonexperimental Research Strategies 158
- The Experimental Research Strategy 159
- The Quasi-Experimental Research Strategy 159
- The Nonexperimental Research Strategy 160
- Nonexperimental and Correlational Research 161
- Research Strategy Summary 161
- Research Strategies, Research Designs, and Research Procedures 161
- Data Structures and Statistical Analysis 164
- Summary 164
- 6.2 Internal and External Validity 165**
 - External Validity 166
 - Internal Validity 167
 - Validity and the Quality of a Research Study 168
- 6.3 Threats to External Validity 169**
 - Category 1: Generalizing Across Participants or Subjects 170
 - Category 2: Generalizing Across Features of a Study 172
 - Category 3: Generalizing Across Features of the Measures 172
- 6.4 Threats to Internal Validity 175**
 - Extraneous Variables 175
 - Confounding Variables 175
 - Extraneous Variables, Confounding Variables, and Internal Validity 176
 - Environmental Variables: General Threats to Internal Validity for All Studies 177
 - Individual Differences: Threats to Internal Validity for Studies Comparing Different Groups 178
 - Time-Related Variables: Threats to Internal Validity for Studies Comparing One Group over Time 179
- 6.5 More About Internal and External Validity 180**
 - Balancing Internal and External Validity 181
 - Artifacts: Threats to Both Internal and External Validity 181
 - Exaggerated Variables 182
 - Validity and Individual Research Strategies 182
 - Chapter Summary 183
 - Key Words 184
 - Exercises 184
 - Engagement Activities 185
 - Learning Check Answers 186
- 7 The Experimental Research Strategy 187**
 - Learning Objectives 187
 - Chapter Overview 187
 - Chapter Preview 188
 - 7.1 Cause-and-Effect Relationships 189**
 - Terminology for the Experimental Research Strategy 191
 - Causation and the Third-Variable Problem 192
 - Causation and the Directionality Problem 193
 - Controlling Nature 193
 - 7.2 Distinguishing Elements of an Experiment 194**
 - Manipulation 195
 - Control 198
 - Extraneous Variables and Confounding Variables 200
 - 7.3 Controlling Extraneous Variables 202**
 - Control by Holding Constant or Matching 202
 - Control by Randomization 204
 - Comparing Methods of Control 205
 - Advantages and Disadvantages of Control Methods 206

- 7.4 Control Groups and Manipulation Checks** 207
 - Control Groups 207
 - Manipulation Checks 209
- 7.5 Increasing External Validity: Simulation and Field Studies** 211
 - Simulation 212
 - Field Studies 214
 - Advantages and Disadvantages of Simulation and Field Studies 214
- Chapter Summary** 215
- Key Words** 216
- Exercises** 217
- Engagement Activities** 218
- Learning Check Answers** 218
- 8 Experimental Designs: Between-Subjects Design** 219
 - Learning Objectives 219
 - Chapter Overview 219
 - Chapter Preview 220
- 8.1 Introduction to Between-Subjects Experiments** 220
 - Review of the Experimental Research Strategy 221
 - Characteristics of Between-Subjects Designs 221
 - Advantages and Disadvantages of Between-Subjects Designs 223
- 8.2 Individual Differences as Confounding Variables** 226
 - Other Confounding Variables 227
 - Equivalent Groups 227
- 8.3 Limiting Confounding by Individual Differences** 228
 - Random Assignment (Randomization) 228
 - Matching Groups (Matched Assignment) 229
 - Holding Variables Constant or Restricting Range of Variability 230
 - Summary and Recommendations 231
- 8.4 Individual Differences and Variability** 232
 - Differences Between Treatments and Variance Within Treatments 235
 - Minimizing Variance Within Treatments 235
 - Summary and Recommendations 237
- 8.5 Other Threats to Internal Validity of Between-Subjects Designs** 238
 - Differential Attrition 238
 - Communication Between Groups 239
- 8.6 Applications and Statistical Analyses of Between-Subjects Designs** 240
 - Two-Group Mean Difference 241
 - Comparing Means for More Than Two Groups 242
 - Comparing Proportions for Two or More Groups 243
- Chapter Summary** 245
- Key Words** 245
- Exercises** 246
- Engagement Activities** 246
- Learning Check Answers** 247
- 9 Experimental Designs: Within-Subjects Design** 249
 - Learning Objectives 249
 - Chapter Overview 249
 - Chapter Preview 250
- 9.1 Within-Subjects Experiments and Internal Validity** 250
 - Characteristics of Within-Subjects Designs 250
 - Threats to Internal Validity to Within-Subjects Experiments 252
 - Separating Time-Related Factors and Order Effects 256
 - Order Effects as a Confounding Variable 256
- 9.2 Dealing with Time-Related Threats and Order Effects** 258
 - Controlling Time 258
 - Switch to a Between-Subjects Design 259

	Counterbalancing: Matching Treatments with Respect to Time	259
	Limitations of Counterbalancing	262
9.3	Comparing Within-Subjects and Between-Subjects Designs	265
	Advantages of Within-Subjects Designs	265
	Disadvantages of Within-Subjects Designs	270
	Choosing Within- or Between-Subjects	271
	Matched-Subjects Designs	272
9.4	Applications and Statistical Analysis of Within-Subjects Designs	274
	Two-Treatment Designs	274
	Multiple-Treatment Designs	275
	Chapter Summary	276
	Key Words	277
	Exercises	277
	Engagement Activities	277
	Learning Check Answers	278
10	The Nonexperimental and Quasi-Experimental Strategies: Nonequivalent Group, Pre-Post, and Developmental Designs	279
	Learning Objectives	279
	Chapter Overview	279
	Chapter Preview	280
10.1	Nonexperimental and Quasi-Experimental Research Strategies	281
	The Structure of Nonexperimental and Quasi-Experimental Designs	282
10.2	Between-Subjects Nonexperimental and Quasi-Experimental Designs: Nonequivalent Group Designs	284
	Threats to Internal Validity for Nonequivalent Group Designs	285
	Nonexperimental Designs with Nonequivalent Groups	286
	A Quasi-Experimental Design with Nonequivalent Groups	290
10.3	Within-Subjects Nonexperimental and Quasi-Experimental Designs: Pre-Post Designs	292
	Threats to Internal Validity for Pre-Post Designs	293
	A Nonexperimental Pre-Post Design	293
	A Quasi-Experimental Pre-Post Design	294
	Single-Case Applications of Time-Series Designs	296
10.4	Developmental Research Designs	297
	The Cross-Sectional Developmental Research Design	298
	The Longitudinal Developmental Research Design	300
10.5	Applications, Statistical Analysis, and Terminology for Nonexperimental, Quasi-Experimental and Developmental Designs	304
	Application and Analysis	304
	Terminology in Nonexperimental, Quasi-Experimental, and Developmental Designs	304
	Chapter Summary	306
	Key Words	307
	Exercises	307
	Engagement Activities	308
	Learning Check Answers	309
11	Factorial Designs	311
	Learning Objectives	311
	Chapter Overview	311
	Chapter Preview	312
11.1	Introduction to Factorial Designs	313
	Experimental Factorial Designs	313
11.2	Main Effects and Interactions	316
	Main Effects	316
	The Interaction Between Factors	318
	Alternative Views of the Interaction Between Factors	319
	Identifying Interactions	321

- Interpreting Main Effects and Interactions 322
- Independence of Main Effects and Interactions 323

- 12.3 Types of Factorial Designs and Analysis 325**
 - Between-Subjects and Within-Subjects Designs 326
 - Experimental and Nonexperimental or Quasi-Experimental Research Strategies 328
 - Pretest-Posttest Control Group Designs 330
 - Higher-Order Factorial Designs 331
 - Statistical Analysis of Factorial Designs 332

- 12.4 Applications of Factorial Designs 333**
 - Expanding and Replicating a Previous Study 333
 - Reducing Variance in Between-Subjects Designs 334
 - Evaluating Order Effects in Within-Subjects Designs 337
- Chapter Summary 343
- Key Words 344
- Exercises 344
- Engagement Activities 345
- Learning Check Answers 346

12 The Correlational Research Strategy 347

- Learning Objectives 347
- Chapter Overview 347
- Chapter Preview 348

- 12.1 An Introduction to Correlational Research 348**
 - Comparing Correlational, Experimental, and Differential Research 349

- 12.2 The Data and Statistical Analysis for Correlational Studies 351**
 - Evaluating Relationships for Numerical Scores (Interval or Ratio Scales) and Ranks (Ordinal Scale) 351

- Evaluating Relationships for Non-Numerical Scores from Nominal Scales 355
- Interpreting and Statistically Evaluating a Correlation 356

- 12.3 Applications of the Correlational Strategy 358**
 - Prediction 358
 - Reliability and Validity 359
 - Evaluating Theories 360
- 12.4 Strengths and Weaknesses of the Correlational Research Strategy 361**
 - Relationships with More Than Two Variables 363
- Chapter Summary 365
- Key Words 365
- Exercises 365
- Engagement Activities 366
- Learning Check Answers 367

13 The Descriptive Research Strategy 369

- Learning Objectives 369
- Chapter Overview 369
- Chapter Preview 370

- 13.1 An Introduction to Descriptive Research 370**
- 13.2 The Observational Research Design 371**
 - Behavioral Observation 372
 - Content Analysis and Archival Research 374
 - Types of Observation and Examples 375
 - Strengths and Weaknesses of Observational Research Designs 378

- 13.3 The Survey Research Design 379**
 - Types of Questions 381
 - Constructing a Survey 385
 - Selecting Relevant and Representative Individuals 386
 - Administering a Survey 387

Strengths and Weaknesses of Survey Research 391

- 13.4** The Case Study Design 393
 - Applications of the Case Study Design 394
 - Strengths and Weaknesses of the Case Study Design 395
- Chapter Summary 398
- Key Words 398
- Exercises 399
- Engagement Activities 399
- Learning Check Answers 400

14 Single-Subject Research Designs 401

- Learning Objectives 401
- Chapter Overview 401
- Chapter Preview 402
- 14.1** Introduction 403
 - Evaluating the Results from a Single-Subject Study 404
- 14.2** Phases and Phase Changes 407
 - Level, Trend, and Stability 408
 - Changing Phases 411
 - Visual Inspection Techniques 412
- 14.3** The ABAB Reversal Design 416
 - Limitations of the ABAB Design 418
 - Variations on the ABAB Design: Creating More Complex Phase-Change Designs 420
- 14.4** Multiple-Baseline Designs 423
 - Rationale for the Multiple-Baseline Design 425
 - Strengths and Weaknesses of the Multiple-Baseline Design 427
- 14.5** Other Single-Subject Designs 429
 - Dismantling, or Component-Analysis, Design 429
 - The Changing-Criterion Design 431
 - The Alternating-Treatments Design 432

- 14.6** General Strengths and Weaknesses of Single-Subject Designs 435
 - Advantages of Single-Subject Designs 435
 - Disadvantages of Single-Subject Designs 436
- Chapter Summary 438
- Key Words 439
- Exercises 439
- Engagement Activities 440
- Learning Check Answers 440

15 Statistical Evaluation of Data 441

- Learning Objectives 441
- Chapter Overview 441
- Chapter Preview 442
- 15.1** The Role of Statistics in the Research Process 443
 - Planning Ahead 443
 - Statistics Terminology 444
- 15.2** Descriptive Statistics 445
 - Frequency Distributions 446
 - Describing Interval and Ratio Data (Numerical Scores) 448
 - Describing Non-Numerical Data from Nominal and Ordinal Scales of Measurement 451
 - Using Graphs to Compare Groups of Scores 451
 - Correlations 454
 - Regression 457
 - Multiple Regression 458
- 15.3** Inferential Statistics 460
 - Hypothesis Tests 462
 - Reporting Results from a Hypothesis Test 466
 - Errors in Hypothesis Testing 467
 - Factors That Influence the Outcome of a Hypothesis Test 468
 - Supplementing Hypothesis Tests with Measures of Effect Size 471

15.4	Finding the Right Statistics for Your Data	476
	Three Data Structures	476
	Scales of Measurement	477
	Category 1: A Single Group of Participants with One Score Per Participant	477
	Category 2: A Single Group of Participants with Two Variables Measured for Each Participant	479
	Category 3: Two or More Groups of Scores with Each Score A Measurement of the Same Variable	481
15.5	Special Statistics for Research	486
	The Spearman-Brown Formula	487
	The Kuder-Richardson Formula 20	487
	Cronbach's Alpha	488
	Cohen's Kappa	489
	Chapter Summary	491
	Key Words	492
	Exercises	492
	Engagement Activities	494
	Learning Check Answers	494
16	Writing an APA-Style Research Report	495
	Learning Objectives	495
	Chapter Overview	495
	Chapter Preview	495
16.1	The Goal of a Research Report	496
16.2	General APA Guidelines for Writing Style and Format	497
	Some Elements of Writing Style	497
	Guidelines for Typing or Word Processing	501
	Manuscript Pages	502
16.3	The Elements of an APA-Style Research Report	502
	Title Page	503
	Abstract	505

	Introduction	506
	Method	509
	Results	511
	Discussion	511
	References	514
	Tables and Figures	514
	Appendix	517
	Conference Presentations: Papers and Posters	517
	Submitting a Manuscript for Publication	519
16.4	Writing a Research Proposal	521
	Why Write a Research Proposal?	521
	How to Write a Research Proposal	522
	Chapter Summary	523
	Key Words	523
	Exercises	524
	Engagement Activities	524
	Learning Check Answers	525

APPENDICES

A	Random Number Table and Instruction	527
B	Statistics Demonstrations and Statistical Tables	531
C	Instructions for Using SPSS	561
D	Sample APA-Style Research Report Manuscript for Publication	585
