Frank D. Gunstone

Modifying lipids for use in food

Contents

<i>Contributor contact details</i>	<i>xiii</i>
1 Introduction: Modifying lipids – why and how?	1
<i>F. Gunstone, Scottish Crop Research Institute, UK</i>	
1.1 Introduction	1
1.2 What properties are desired?	2
1.3 Methods of modifying oils and fats	4
1.4 Technological methods	5
1.5 Biological methods	6
1.6 References	8
Part I Understanding food lipid structure and composition	9
2 Vegetable sources of lipids	11
<i>F. Gunstone, Scottish Crop Research Institute, UK</i>	
2.1 Introduction	11
2.2 Major vegetable sources of food lipids	13
2.3 Minor vegetable sources of food lipids	22
2.4 Extraction and uses	25
2.5 Future trends	26
2.6 Sources of further information and advice	26
2.7 References	27
3 Lipids from land animals	28
<i>M.R.L. Scheeder, ETH Zurich, Switzerland</i>	
3.1 Introduction	28
3.2 Animal fats	29
3.3 Milk fat	44
3.4 Future trends	50
3.5 Sources of further information and advice	51
3.6 References	52

4	Fish oils and lipids from marine sources	56
	<i>B. Hjaltason, EPAX AS, Iceland and G. G. Haraldsson, University of Iceland, Iceland</i>	
4.1	Introduction	56
4.2	Fish oils, their main characteristics and composition	58
4.3	Production of fish oil	64
4.4	Fish oil stability and protection	68
4.5	Commercial fish oils	70
4.6	Fish oil application	74
4.7	References	76
5	Lipids from microbial sources	80
	<i>C. Ratledge and S. Hopkins, University of Hull, UK</i>	
5.1	Introduction	80
5.2	Oleaginous micro-organisms, fatty acids and lipid accumulation	81
5.3	Large-scale cultivation of oleaginous micro-organisms, costs, oil extraction and refinement	84
5.4	The production of an SCO rich in γ -linolenic acid (Oil of Javanicus)	90
5.5	Production of arachidonic acid-SCO	93
5.6	Production of DHA-rich SCOs	96
5.7	Prospects for other PUFA-SCOs	103
5.8	Future trends	105
5.9	References	109
6	Methods of analysis to determine the quality of oils	114
	<i>K. Warner, National Center for Agricultural Utilization Research, USA</i>	
6.1	Introduction	114
6.2	Methods to measure compositional attributes	115
6.3	Methods of measuring characteristics of edible oils	119
6.4	Future trends	124
6.5	Sources of further information and advice	125
6.6	References	125
7	Selected topics in the chemistry and biochemistry of lipids	128
	<i>F. Gunstone, Scottish Crop Research Institute, UK</i>	
7.1	Introduction	128
7.2	Partial hydrogenation	128
7.3	Autoxidation, photo-oxidation, and antioxidants	130
7.4	Reactions of esters and other acyl compounds	137
7.5	Metabolism of linoleic and linolenic acids	138
7.6	Sources of further information and advice	140
7.7	References	141

8	Structure and properties of fat crystal networks	142
	<i>S. Martini, T. Awad and A. G. Marangoni, University of Guelph, Canada</i>	
8.1	History and introduction	142
8.2	Crystallization and melting	143
8.3	Mechanical properties and structure	152
8.4	Fat crystal networks and microstructure	155
8.5	Structuring fat crystal network using processing	162
8.6	Future trends	165
8.7	References	166
Part II	Modifying lipids for use in food	171
9	Hydrogenation of lipids for use in food	173
	<i>G. R. List, National Center for Agricultural Utilization Research, USA and J. W. King, University of Arkansas, USA</i>
