Preface

ix

Contributors

xi

1. Developments in Multiple Sclerosis: Research Overview

Robert M. Herndon, M.D.

1

I

MORPHOLOGIC SUBSTRATES OF DEMYELINATION

2. Morphology of Oligodendrocytes and Myelin

Robert Skoff, Ph.D.

7

3. Astrocytes: Structure and Function

Robert M. Herndon, M.D.

25

4. Molecular Structure of the Myelin Membrane

Joyce A. Benjamins, Ph.D.

31

II

EXPERIMENTAL ASPECTS OF DEMYELINATION

5. The Nature of Immunologic Privilege in the Central Nervous System

Zsuzsa Fabry, Ph.D., Matyas Sandor, Ph.D., Diane Sewell, Ph.D., and Emily Reinke

53

6. Experimental Autoimmune Encephalomyelitis

LaChelle R. Arredondo, Amy E. Lovett-Racke, and Michael K. Racke, M.D.

79

7. Tissue Culture Studies of Demyelination and Remyelination

Fredrick J. Seil, M.D.

105

8. Multiple Sclerosis: The Role of Pathogens in Demyelination

John W. Rose, M.D. and John E. Greenlee, M.D.

113

9. Viral Demyelinating Diseases in Experimental Animals
Jane E. Libbey, M.S. and Robert S. Fujinami, Ph.D. 125
10. *Chlamydia pneumoniae* Infection and its Association with Multiple Sclerosis
Harold Moses, Jr., M.D. and Subramaniam Sriram, M.D. 135

III CYTOKINES, CHEMOKINES, AND INTERFERONS

11. Role of Cytokines in Multiple Sclerosis and Experimental Autoimmune Encephalomyelitis
Tanuja Chitnis, M.D. and Samia J. Khoury, M.D. 145
12. Chemokines and Their Receptors in Multiple Sclerosis
Richard M. Ransohoff, M.D. and William J. Karpus, Ph.D. 159
13. Interferons in Multiple Sclerosis
Suhayl Dhib-Jalbut, M.D. 175

IV PATHOLOGY

14. The Pathology of Multiple Sclerosis and Its Variants
Robert M. Herndon, M.D. 185
15. Pathology of Multiple Sclerosis as Revealed by In Vivo Magnetic Resonance-Based Approaches
Jack H. Simon M.D., Ph.D. 199
16. Mechanisms of Repair, Adaptation, and Recovery of Function in Multiple Sclerosis
Robert M. Herndon, M.D. 215

- Index* 223
