CONTENTS

PART ONE

CONTEXT OF PSYCHOLOGICAL TESTING

1. *Functions and Origins of Psychological Testing* 3
 - Uses of psychological tests 3
 - Early interest in classification and training of the mentally retarded 6
 - The first experimental psychologists 7
 - Contributions of Francis Galton 8
 - Cattell and the early "mental tests" 9
 - Binet and the rise of intelligence tests 10
 - Group testing 12
 - Aptitude testing 13
 - Standardized achievement tests 15
 - Assessment of personality 17
 - Sources of information about tests 19
2. *Nature and Use of Psychological Tests* 23
 - What is a psychological test? 23
 - Why control the use of psychological tests? 30
 - Test administration 33
 - Examiner and situational variables 38
 - Test anxiety 40
 - Effects of training on test performance 43
3. *Social and Ethical Considerations in Testing* 48
 - Ethical issues in psychological testing 49
 - User qualifications 50
 - Responsibilities of test publishers 52
 - Protection of privacy 54
 - Confidentiality 57
 - Communicating test results 59
 - Testing cultural minorities 60

PART TWO

TECHNICAL AND METHODOLOGICAL PRINCIPLES

4. <i>Norms and the Interpretation of Test Scores</i>	71
Statistical concepts	72
Developmental norms	77
Within-group norms	81
Relativity of norms	91
Computer use in the interpretation of test scores	98
Criterion-referenced testing	101
Expectancy tables	106
5. <i>Reliability</i>	109
The correlation coefficient	110
Types of reliability	116
Reliability of speeded tests	127
Dependence of reliability coefficients on the sample tested	130
Standard error of measurement	133
Reliability of criterion-referenced tests	137
6. <i>Validity: Basic Concepts</i>	139
Content-related validation	140
Criterion-related validation	145
Construct-related validation	153
Overview of validation concepts	162
7. <i>Validity: Measurement and Interpretation</i>	165
Validity coefficient and error of estimate	166
Test validity and decision theory	170
Combining information from different tests	183
Use of tests for classification decisions	189
Statistical analyses of test bias	193
8. <i>Item Analysis</i>	202
Item difficulty	203
Item discrimination	210

Item response theory	219
Item analysis of speeded tests	224
Cross-validation	226
Assessment of item bias	228
Explorations in test design	233

PART THREE

TESTS OF GENERAL INTELLECTUAL LEVEL

9. <i>Individual Tests</i>	237
Stanford-Binet Intelligence Scale	238
The Wechsler scales	248
Assessment of competence	264
Kaufman Assessment Battery for Children	266
10. <i>Tests for Special Populations</i>	271
Infant and preschool testing	272
Comprehensive assessment of the mentally retarded	284
Testing the physically handicapped	290
Cross-cultural testing	297
11. <i>Group Testing</i>	310
Group tests versus individual tests	311
Adaptive testing and computer-based administration	314
A group-administered unilevel aptitude battery	317
Multilevel batteries	321
Tests for the college level and beyond	328
12. <i>Psychological Issues in Intelligence Testing</i>	336
Longitudinal studies of children's intelligence	337
Intelligence in early childhood	341
Problems in the testing of adult intelligence	346
Population changes in intelligence test performance	352
Problems in cross-cultural testing	355
Nature of intelligence	362

PART FOUR

TESTS OF SEPARATE ABILITIES

13. <i>Measuring Multiple Aptitudes</i>	373
Factor analysis	374
Theories of trait organization	381
Multiple aptitude batteries	390
Measurement of creativity	402
14. <i>Educational Testing</i>	411
Achievement tests: Their nature and uses	411
General achievement batteries	418
Tests of minimum competency in basic skills	424
Standardized tests in separate content areas	428
Teacher-made classroom tests	430
Diagnostic and prognostic testing	434
Assessment in early childhood education	441
15. <i>Occupational Testing</i>	450
Validation of employment tests	451
The role of academic intelligence	458
Special aptitude tests	460
Testing in the professions	468
Career counseling	475
16. <i>Clinical Testing</i>	479
Diagnostic use of intelligence tests	480
Neuropsychological tests	485
Identifying specific learning disabilities	496
Behavioral assessment	505
Clinical judgment	511
Computerized clinical assessment	517

PART FIVE

PERSONALITY TESTS

17. <i>Self-report Inventories</i>	523
Content-related validation	524
Empirical criterion keying	525

Factor analysis in test development	540	
Personality theory in test development	543	
Test-taking attitudes and response biases	549	
Traits, states, and situations	555	
Current status of personality inventories	560	
 18. <i>Measuring Interests, Values, and Attitudes</i>		562
Interest inventories: The Strong Vocational Interest Blank (SVIB) and its revisions	563	
Interest inventories: Overview and some highlights	572	
Assessment of values	580	
Opinion surveys and attitude scales	584	
Locus of control	588	
Masculinity-femininity (M-F) scales	590	
 19. <i>Projective Techniques</i>		594
Nature of projective techniques	594	
Inkblot techniques	595	
Thematic Apperception Test and related instruments	602	
Other projective techniques	606	
Evaluation of projective techniques	612	
 20. <i>Other Assessment Techniques</i>		624
"Objective" performance tests	625	
Situational tests	631	
Self-concepts and personal constructs	635	
Observer reports	642	
Biographical inventories	650	
Measurement techniques in emerging fields	652	

APPENDICES

A. <i>Ethical Principles of Psychologists</i>	665
B. <i>A Suggested Outline for Test Evaluation</i>	676

C. <i>Test Publishers</i>	678
D. <i>Classified List of Representative Tests</i>	681
REFERENCES	693
NAME INDEX	783
SUBJECT INDEX	803
