

*An Introduction to Orthopaedics, Fractures
and Joint Injuries, Rheumatology,
Metabolic Bone Disease and Rehabilitation*

Textbook of Disorders and Injuries of the Musculoskeletal System

Third Edition

1,360 Illustrations on 860 Figures
670 New References

Contents

Foreword by Henry R. Cowell, M.D., Ph.D., vii

Preface, ix

About the Author, xi

Acknowledgments, xiii

Section I Basic Musculoskeletal Science and Its Application

- 1 Introduction: The Past and the Present, 1
- 2 Normal Structure and Function of Musculoskeletal Tissues, 7
- 3 Reactions of Musculoskeletal Tissues to Disorders and Injuries, 29
- 4 Some Important Pairs of Clinical Terms, 51
- 5 Diagnosis of Musculoskeletal Disorders and Injuries, 61
- 6 General Principles and Specific Methods of Musculoskeletal Treatment, 91

Section II Musculoskeletal Disorders—General and Specific

- 7 Common Normal Variations, 117
- 8 Congenital Abnormalities, 131
- 9 Generalized and Disseminated Disorders of Bone, 183
- 10 Inflammatory Disorders of Bones and Joints, 207
- 11 Degenerative Disorders of Joints and Related Tissues, 257
- 12 Neuromuscular Disorders, 303
- 13 Disorders of Epiphyses and Epiphyseal Growth, 339
- 14 Neoplasms of Musculoskeletal Tissues, 379

Section III Musculoskeletal Injuries

- 15 Fractures and Joint Injuries—General Features, 417
- 16 Specific Fractures and Joint Injuries in Children, 499
- 17 Specific Fractures and Joint Injuries in Adults, 561

Section IV Research

- 18 The Philosophy and Nature of Medical Research with One Example, 657

Index, 673

Contents

Section I Basic Musculoskeletal Science and Its Application

- 1 Introduction: The Past and the Present, 1**
 - Brief Historical Background, 1
 - The Scope of Orthopaedics, 2
 - Current Trends in Clinical Conditions of the Musculoskeletal System, 3
 - Recent Advances, 3
- 2 Normal Structure and Function of Musculoskeletal Tissues, 7**
 - Bones as Structures and Bone as an Organ, 7**
 - Embryonic Development of Bones, 7
 - Bone Growth and Remodeling, 9
 - Growth in Length, 9
 - Growth in Width, 11
 - Remodeling of Bone, 11
 - Anatomy and Histology of Bones as Structures, 11
 - Anatomical Structure, 11
 - Blood Supply to Long Bones, 11
 - Histological Structure, 12
 - Biochemistry and Physiology of Bone as an Organ, 14
 - Biochemistry of Bone, 14
 - Calcium and Phosphorus Metabolism, 15
 - Joints and Articular Cartilage, 17**
 - Classification of the Types of Joints, 17
 - Embryonic Development of Synovial Joints, 18
 - Anatomy and Histology of Synovial Joints, 18
 - Anatomical Structure, 18
 - Histological Structure of Articular Cartilage, 20
 - Bone and Cartilage: Similarities and Differences, 22
 - Structure and Functions of the Synovial Membrane, 22
 - Synovial Fluid, 22
 - Skeletal Muscles, 23**
 - Anatomy and Histology of Skeletal Muscle, 23
 - Biochemistry and Physiology of Muscle, 25
 - Tendons and Ligaments, 26**
- 3 Reactions of Musculoskeletal Tissues to Disorders and Injuries, 29**
 - Bone, 29**
 - Reactions of Bone, 29

- Examples of Reactions of Living Bone, 31
 - Generalized Reactions of All Bone as an Organ, 31
 - Localized Reactions of Bone as a Structure, 31

Epiphyseal Plates, 33

- Reactions of Epiphyseal Plates, 33
- Examples of Reactions of Epiphyseal Plates, 33
 - Generalized Reactions of All Epiphyseal Plates, 33
 - Localized Reactions of an Epiphyseal Plate, 33

Synovial Joints, 35

- Reactions of Articular Cartilage, 35
- Reactions of Synovial Membrane, 39
- Reactions of Joint Capsule and Ligaments, 39

Skeletal Muscle, 44

- Reactions of Skeletal Muscle, 44
 - Disuse Atrophy, 44
 - Work Hypertrophy, 44
 - Ischemic Necrosis (See Chapter 15), 44
 - Contracture, 44
 - Regeneration, 44

Musculoskeletal Deformities, 45

- Types of Bony Deformity, 45
 - Loss of Alignment, 45
 - Abnormal Length, 45
 - Bony Outgrowth, 45
- Causes of Bony Deformity, 45
 - Congenital Abnormalities of Bony Development (See Chapter 8), 45
 - Fractures (See Chapters 15 to 17), 46
 - Disturbances of Epiphyseal Plate Growth (See Chapters 7, 8, 13, and 16), 46
 - Bending of Abnormally Soft Bone (See Chapter 9), 46
 - Overgrowth of Adult Bone (See Chapters 9 and 14), 46
- Types of Joint Deformity, 46
 - Displacement of the Joint, 46
 - Excessive Mobility (Hypermobility) of the Joint, 46
 - Restricted Mobility of the Joint, 46
- Causes of Joint Deformity, 46
 - Congenital Abnormalities of Joint Development (See Chapter 8), 46
 - Acquired Dislocations, 47
 - Mechanical Blocks, 47
 - Joint Adhesions, 47
 - Muscle Contractures, 48
 - Muscle Imbalance, 48
 - Fibrous Contractures of Fascia and Skin, 48
 - External Pressures, 48
 - Joint Deformities of Unknown Cause (Idiopathic), 48

4 Some Important Pairs of Clinical Terms, 51

Terms Describing Movements of Joints, 51

- Active and Passive Movement, 51
- Abduction and Adduction, 51
- Flexion and Extension, 51
- Dorsiflexion and Plantar (or Palmar) Flexion, 51
- Eversion and Inversion, 51
- Internal Rotation and External Rotation, 52
- Pronation and Supination, 52

Terms Describing Deformities in Limbs, 54

- Calcaneus and Equinus, 54
- Cavus and Planus, 55

- Internal Torsion and External Torsion, 55
- Anteversion and Retroversion, 55
- Angulation or Bowing Deformities, 56
- Varus and Valgus, 56
 - Varus, 57
 - Valgus, 58

- Clinical Measurement of Joint Motion and Deformity, 58
 - The Anatomical Position, 59

5 Diagnosis of Musculoskeletal Disorders and Injuries, 61

Methods of Obtaining Data (Clues)—The Investigation, 61

- The Patient's Story (Clinical History), 61
 - Important Data in the Patient's History, 63

Physical Examination, 64

- Looking (Inspection), 65
- Feeling (Palpation), 66
- Moving (Assessment of Joint Motion), 66
- Listening (Auscultation), 66
- Special Physical Tests, 67
- Neurological Examination, 68

Diagnostic Imaging, 68

- Plain (Conventional) Radiography, 69
- Inspection of a Radiograph, 72
- Scintigraphy, 77
- Plain (Conventional) Tomography, 78
- Computed Tomography, 78
- Ultrasonography (Ultrasound), 81
- Magnetic Resonance Imaging, 81

Laboratory Investigation, 83

Diagnostic Arthroscopy, 86

Antenatal Diagnosis, 86

Correlation of all Data (Clues), 88

Communication with your Patients About the Diagnosis, 89

6 General Principles and Specific Methods of Musculoskeletal Treatment, 91

General Principles of Treatment, 91

A Litany for Medical Practitioners, 93

General Forms and Specific Methods of Treatment, 93

Forms of Treatment, 93

Specific Methods of Treatment, 93

- 1) Psychological Considerations, 94
- 2) Therapeutic Drugs, 94
- 3) Orthopaedic Apparatus and Appliances, 95
- 4) Physical and Occupational Therapy (Fig. 6.8), 98
- 5) Surgical Manipulation, 99
- 6) Surgical Operations, 100
- 7) Electrical Stimulation of Fracture Healing, 110
- 8) Continuous Passive Motion, 111
- 9) Radiation Therapy (Radiotherapy), 111

Rehabilitation—A Philosophy in Action, 113

Communication with your Patients About the Recommended Treatment, 114

- The Doctor–Patient Relationship as Part of Treatment, 114

Section II Musculoskeletal Disorders—General and Specific

7 Common Normal Variations, 117

Common Normal Variations in Children, 118

Variations Caused by Hypermobility of Joints (Joint Laxity), 118

Flexible Flat Feet (Hypermobile Pes Planus), 118

Knock Knees (Genu Valgum), 120

Variations Caused by Torsional Deformities of Bones, 121

Toeing Out, 123

Toeing In, 123

Bow Legs (Genu Varum), 125

Normal Variations in Adults, 127

Normal Aging Process in the Musculoskeletal System, 127

8 Congenital Abnormalities, 131

General Features, 131

Definition and Variety, 131

Incidence, 131

Etiological Factors, 131

Genetic Defects, 131

Environmental Influences, 133

Combination of Genetic Defects and Environmental Influences, 133

Types of Congenital Musculoskeletal Abnormalities, 133

Localized Abnormalities, 133

Generalized Abnormalities, 134

Diagnosis of Congenital Abnormalities, 134

Antenatal Diagnosis, 134

Postnatal Diagnosis, 134

Principles and Methods of Treatment, 135

Localized Congenital Abnormalities of the Lower Limb, 135

The Foot, 135

Toe Deformities, 135

Metatarsus Primus Varus, 136

Metatarsus Adductus (Metatarsus Varus), 136

Clubfoot (Talipes Equinovarus), 138

Talipes Calcaneovalgus, 140

Congenital Plantar Flexed (Vertical) Talus, 140

Tarsal Coalition (Rigid Valgus Foot), 141

Accessory Tarsal Navicular, 142

The Long Bones, 142

Pseudarthrosis of the Tibia, 142

Hypoplasia of the Long Bones, 143

The Knee, 143

Dislocation of the Knee, 143

Dislocation of the Patella, 144

Discoid Lateral Meniscus, 144

The Hip, 144

Developmental Coxa Vara, 144

Dislocation and Subluxation of the Hip (Developmental Displacement of the Hip; Developmental Dysplasia of the Hip), 146

Amputations in the Lower Limb, 156

Hemihypertrophy, 158

Localized Congenital Abnormalities of the Upper Limb, 158

The Hand, 158

Trigger Thumb, 158

Webbing of the Fingers (Syndactyly), 159

The Forearm, 159

Hypoplasia of the Radius (Clubhand), 159

The Elbow, 160

Dislocation of the Head of the Radius, 160

Radioulnar Synostosis, 160

Hypoplasia of the Clavicles, 161

High Scapula (Sprengel's Deformity), 161

Amputations in the Upper Limb, 162**Localized Congenital Abnormalities of the Spine, 165****Spina Bifida, 165**

Etiological Factors, 165

The Possible Prevention of Spina Bifida, 165

Pathology of Spina Bifida, 165

Spina Bifida Occulta, 165

Spina Bifida with Meningocele, 166

Spina Bifida with Meningomyelocele, 166

Spina Bifida with Myelocele (Rachischisis), 167

Clinical Course of the Neurological Deficit, 168

Treatment of Spina Bifida with Neurological Deficit, 168

Scoliosis, 170

Synostosis of the Cervical Spine (Klippel-Feil Syndrome), 170

Muscular Torticollis (Wry Neck), 171

Generalized Congenital Abnormalities, 172**Generalized Abnormalities of Bone, 172**

Osteogenesis Imperfecta (Fragilitas Ossium; Brittle Bones), 172

Achondroplasia (Chondrodystrophia Fetalis), 173

Arachnodactyly (Hyperchondroplasia) (Marfan's Syndrome), 174

Enchondromatosis (Multiple Enchondromata) (Ollier's Dyschondroplasia), 175

Multiple Hereditary Exostoses (Diaphyseal Aclasis), 175

Generalized Abnormalities of Nerve and Muscle, 177

Neurofibromatosis (von Recklinghausen's Disease), 177

Hypotonia of Neuromuscular Origin (Amyotonia Congenita, Spinal Muscular Atrophy), 178

Amyoplasia Congenita (Arthrogryposis Multiplex Congenita) (Myodystrophia Fetalis), 178

9 Generalized and Disseminated Disorders of Bone, 183**Generalized Bone Disorders Caused by Metabolic Disturbances (Metabolic Bone Disease), 183****Rickets, 184**

Pathology, 184

Diagnosis, 184

Osteomalacia, 187

Pathology, 187

Diagnosis, 187

Treatment, 188

Scurvy (Avitaminosis C), 188

Pathology, 189

Clinical Features, 189

Radiographic Features, 190

Differential Diagnosis, 190

Osteoporosis, 190

Etiological Factors, 191

Hormonal Osteoporosis (Endocrine Osteoporosis), 191

Disuse Osteoporosis, 191

Postmenopausal and Senile Osteoporosis, 191

Pathology, 192

- Clinical Diagnosis, 193
- Radiographic Diagnosis, 193
- Laboratory Diagnosis, 193
- Treatment, 193
- Hyperparathyroidism (Parathyroid Osteodystrophy) (Osteitis Fibrosa Cystica), 194**
 - Etiology and Pathology, 195
 - Diagnosis, 195
 - Treatment, 196
- Hyperpituitarism, 196**
 - Gigantism, 196
 - Acromegaly, 196
 - Cushing's Syndrome, 197
- Hypopituitarism, 197**
- Hypothyroidism in Childhood (Cretinism), 198**
- Disseminated Bone Disorders, 198**
 - Polyostotic Fibrous Dysplasia, 198**
 - Pathology, 198
 - Diagnosis, 199
 - Treatment, 199
 - Paget's Disease (Osteitis Deformans), 199**
 - Etiology, 199
 - Pathology, 199
 - Diagnosis, 200
 - Treatment, 201
 - The Histiocytoses, 202**
 - Langerhans Cell Histiocytosis (Histiocytosis X), 202
 - Gaucher's Disease—Lipid Histiocytosis, 205

10 Inflammatory Disorders of Bones and Joints, 207

- The Inflammatory Process: General Features, 207**
- Reactions of the Musculoskeletal Tissues to Inflammation, 207**
- Types of Inflammatory Disorders of Bones and Joints, 208**
 - Pyogenic Bacterial Infections, 208**
 - Principles of Antibacterial Therapy, 208
 - Acute Hematogenous Osteomyelitis, 209**
 - Incidence, 209
 - Etiology, 209
 - Pathogenesis and Pathology, 209
 - Clinical Features and Diagnosis, 211
 - Treatment, 214
 - Prognosis, 214
 - Complications of Acute Hematogenous Osteomyelitis, 215
 - Chronic Hematogenous Osteomyelitis, 216**
 - Incidence, 216
 - Pathogenesis and Pathology, 216
 - Clinical Features and Diagnosis, 217
 - Treatment, 217
 - Complications, 218
 - Acute Septic Arthritis (Pyogenic Arthritis), 218**
 - Incidence, 218
 - Etiology, 218
 - Pathogenesis and Pathology, 218
 - Clinical Features and Diagnosis, 219
 - Septic Arthritis in Infants, 219

Septic Arthritis in Older Children and Adults, 219	
Treatment, 220	
Prognosis, 221	
Complications of Acute Septic Arthritis, 221	
Hematogenous Osteomyelitis of the Spine, 221	
Clinical Features and Diagnosis, 222	
Treatment and Prognosis, 223	
Osteomyelitis and Septic Arthritis Secondary to Wounds, 223	
Chronic Recurrent Multifocal Osteomyelitis, 224	
Pyogenic Infections in the Hand, 224	
Pyogenic Tenosynovitis, 224	
Necrotizing Fasciitis, 226	
Meningococcal Septicemia, 226	
Viral Infections, 226	
Human Immunodeficiency Virus and Acquired Immunodeficiency Syndrome, 226	
Granulomatous Bacterial Infections, 226	
Tuberculous Infections: General Features, 226	
Establishment of Infection, 227	
Principles of Antituberculous Therapy, 227	
Tuberculous Osteomyelitis, 228	
Tuberculous Osteomyelitis of the Spine (Tuberculous Spondylitis; Pott's Disease), 228	
Tuberculous Arthritis, 230	
Pathogenesis and Pathology, 230	
Clinical Features and Diagnosis, 230	
Treatment, 231	
Nonspecific Inflammatory Disorders of Joints, 231	
Classification of Rheumatic Diseases, 231	
Prevalence of the Rheumatic Diseases, 232	
Adult Rheumatoid Arthritis, 232	
Incidence, 232	
Etiology, 232	
Pathogenesis and Pathology, 233	
Clinical Features and Diagnosis, 234	
Prognosis, 237	
Treatment, 237	
Aims of Treatment, 238	
Methods of Treatment, 238	
Diffuse Connective Tissue Diseases ("Collagen Diseases"), 240	
Juvenile Rheumatoid Arthritis (Juvenile Chronic Arthritis), 240	
Ankylosing Spondylitis, 242	
Incidence, 242	
Etiology, 242	
Pathogenesis and Pathology, 243	
Clinical Features and Diagnosis, 243	
Treatment, 244	
Reiter's Syndrome, 245	
Psoriasis, 245	
Rheumatic Fever, 245	
Etiology, 245	
Pathology, 245	
Clinical Features and Diagnosis, 245	
Treatment, 246	
Transient Synovitis of the Hip Joint in Children, 246	

- Gout and Gouty Arthritis, 247
 - Incidence, 247
 - Etiology, 247
 - Pathogenesis and Pathology, 248
 - Clinical Features, 248
 - Acute Gouty Arthritis, 248
 - Chronic Tophaceous Gout, 248
 - Chronic Gouty Arthritis, 249
 - Pseudogout, 250
- Rheumatic Disease Unit, 250
- Hemophilic Arthritis, 251
 - Incidence, 251
 - Pathogenesis and Pathology, 251
 - Clinical Features and Diagnosis, 251
 - Treatment, 252

11 Degenerative Disorders of Joints and Related Tissues, 257

- Normal Aging of Articular Cartilage, 257**
- Degenerative Joint Disease (Osteoarthritis), 257**
 - Incidence, 257
 - Etiology, 258
 - Primary Idiopathic Degenerative Joint Disease, 258
 - Secondary Degenerative Joint Disease, 258
 - Pathogenesis and Pathology in Synovial Joints, 258**
 - Articular Cartilage, 258
 - Subchondral Bone, 260
 - Synovial Membrane and Fibrous Capsule, 261
 - Muscles, 262
 - Clinical Features and Diagnosis, 262**
 - Prognosis, 263**
 - Treatment, 264**
 - Aims of Treatment, 264
 - Methods of Treatment, 264
 - Surgical Treatment of Degenerative Joint Disease in Specific Synovial Joints, 266**
 - Foot and Ankle, 266
 - Knee, 266
 - Hip, 269
 - Hand and Wrist, 271
 - Elbow, 272
 - Shoulder, 272
- Degenerative Joint Disease in the Spine, 272**
 - Form and Function of the Spinal Joints, 272**
 - Intervertebral Disc Joints, 273
 - Posterior Facet Joints, 273
- Degenerative Joint Disease in the Lumbar Spine, 273**
 - Etiology, 273
 - Pathogenesis and Pathology, 274**
 - Disc Degeneration, 274
 - Segmental Instability, 274
 - Segmental Hyperextension, 275
 - Segmental Narrowing, 275
 - Herniation of the Intervertebral Disc, 276
 - Spinal Stenosis, 276

Clinical Features and Diagnosis of Various Syndromes in the Lumbar Spine, 276

- Segmental Instability, 276
- Segmental Hyperextension, 277
- Segmental Narrowing, 277
- Herniation of the Intervertebral Disc, 277
- Spinal Stenosis, 279

Differential Diagnosis of Low Back Pain, 280

Treatment of Degenerative Joint Disease in the Lumbar Spine, 280

- Aims of Treatment, 280
- Methods of Treatment, 281

Degenerative Joint Disease in the Cervical Spine, 284

- Pathogenesis and Pathology, 284
- Clinical Features and Diagnosis, 285
- Differential Diagnosis of Neck and Arm Pain, 285
- Treatment of Degenerative Joint Disease in the Cervical Spine, 286

Neuropathic Joint Disease (Charcot's Joint), 287

- Incidence and Etiology, 287
- Pathogenesis and Pathology, 287
- Clinical Features and Diagnosis, 287
- Treatment, 288

Nonarticular Rheumatism, 288

Myofascial Pain Syndrome ("Fibrositis"), 288

- Clinical Features, 289
- Treatment, 289

Degenerative Tendon and Capsule Disease, 289

- Incidence and Etiology, 289
- Pathogenesis and Pathology, 290
- Degenerative Tendon and Capsule Disease in the Shoulder, 290

12 Neuromuscular Disorders, 303

Clinical Manifestations of Neurological Disorders and Injuries, 303

- Pathological Factors, 303
- Clinical Manifestations of Lesions in Specific Systems of Neurons, 303
 - Upper Motor Neuron (Corticospinal) Lesions, 304
 - Extrapyramidal System Lesions, 304
 - Cerebellar Lesions, 304
 - Spinal Cord Lesions, 304
 - Lower Motor Neuron Lesions, 305
 - Diagnostic Imaging of the Nervous System, 305

Pathogenesis of Neurogenic Deformities of the Musculoskeletal System, 305

Principles of Orthopaedic Treatment of Neurological Disorders and Injuries, 306

Disorders of the Brain, 308

- Cerebral Palsy, 308
 - Incidence, 308
 - Etiology, 308
 - Pathogenesis and Pathology, 308
 - Clinical Features and Diagnosis, 309
 - Prognosis, 311
 - Treatment of Cerebral Palsy, 312
 - Cerebral Palsy in the Adult, 315
 - Cerebrovascular Disease and Hemiplegia, 315
- ## Disorders and Injuries of the Spinal Cord, 316
- Congenital Myelodysplasia, 316

- Diastatomyelia, 316
 - Syringomyelia, 316
 - Poliomyelitis, 317
 - Incidence and Etiology, 317
 - Prevention, 318
 - Pathogenesis and Pathology, 318
 - Clinical Features and Diagnosis, 318
 - Treatment, 318
 - Postpolio Syndrome, 320
 - Spinocerebellar Degenerations, 321
 - Friedreich's Ataxia, 321
 - Spinal Paraplegia and Quadriplegia, 321
 - Incidence and Etiology, 322
 - Clinical Features, 322
 - Disorders and Injuries of the Spinal Nerve Roots and Peripheral Nerves, 324**
 - Polyneuropathy, 324**
 - Hereditary Motor and Sensory Neuropathies, 324
 - Acute Inflammatory Demyelinating Polyneuropathy (Guillain-Barré Syndrome), 325
 - Other Forms of Polyneuropathy, 325
 - Compression of Spinal Nerve Roots, 325**
 - Peripheral Nerve Entrapment Syndromes, 326**
 - Median Nerve at the Wrist (Carpal Tunnel Syndrome), 326
 - Ulnar Nerve at the Elbow (Delayed or Tardy Ulnar Palsy), 326
 - Radial Nerve at the Axilla (Crutch Palsy), 327
 - Brachial Plexus at the Thoracic Outlet (Scalenus Syndrome), 327
 - Digital Nerves in the Foot (Morton's Neuroma and Metatarsalgia), 327
 - Acute Injuries to Nerve Roots and Peripheral Nerves, 328**
 - Classification of Nerve Injuries, 328
 - Clinical Features and Diagnosis, 328**
 - Prognosis and Recovery, 329
 - Treatment of Acute Nerve Injuries, 329
 - Traction Injuries of the Brachial Plexus, 329
 - Birth Injuries of the Brachial Plexus (Obstetrical Paralysis), 329
 - Brachial Plexus Injuries Resulting from Accidents, 331
 - Acute Injuries to Specific Peripheral Nerves, 332
 - Disorders of Muscle, 332**
 - Muscular Dystrophies, 332**
 - Types of Muscular Dystrophies, 332
 - Treatment of Muscular Dystrophy, 334
- 13 Disorders of Epiphyses and Epiphyseal Growth, 339**
- Nutrition of the Epiphysis and its Epiphyseal Plate, 339**
 - Avascular Necrosis of Bone, 339**
 - Idiopathic Avascular Necrosis of Epiphyses (The Osteochondroses), 340**
 - General Features of the Osteochondroses, 341**
 - Incidence and Etiology, 341
 - Pathogenesis and Pathology, 341
 - Clinical Features and Diagnosis, 344
 - Sequelae, 344
 - Aims and Principles of Treatment, 345
 - Specific Osteochondroses of Secondary Centers of Ossification (Pressure Epiphyses), 345
 - Osteochondrosis of the Femoral Head (Legg-Perthes' Disease), 345**
 - Incidence and Etiology, 345

Pathogenesis and Pathology, 346
 Clinical Features and Diagnosis, 346
 Complications, 346
 Prognosis, 347

Osteochondrosis of the Capitellum (Panner's Disease), 350
 Osteochondrosis of a Metatarsal Head (Freiberg's Disease), 350
 Osteochondrosis of Secondary Centers of Ossification in the Spine (Scheuermann's Disease), 351

Incidence and Etiology, 351
 Pathogenesis and Pathology, 352
 Clinical Features and Diagnosis, 352

Specific Osteochondroses of Primary Centers of Ossification, 353

Osteochondrosis of the Tarsal Navicular (Kohler's Disease), 353
 Osteochondrosis of the Lunate (Kienböck's Disease), 353
 Osteochondrosis of a Primary Center of Ossification in the Spine (Calvé's Disease), 354

Tangential Avascular Necrosis of a Pressure Epiphysis (Osteochondritis Dissecans), 355

Incidence and Etiology, 355
 Pathogenesis and Pathology, 355
 Clinical Features and Diagnosis, 355
 Prognosis, 356
 Treatment, 356

Nontraumatic Osteonecrosis of the Femoral Head in Adults, 357

Nontraumatic Osteonecrosis of the Knee in Adults, 358

Posttraumatic Avascular Necrosis of Traction Epiphyses (Apophyses), 358

Partial Avulsion of the Tibial Tubercle (Osgood-Schlatter's Disease), 358
 Partial Avulsion of the Calcaneal Apophysis (Sever's Disease), 359

Posttraumatic Avascular Necrosis of Subchondral Bone, 359

Miscellaneous Causes of Avascular Necrosis of Subchondral Bone, 360

Disorders of Epiphyseal Growth, 361

Slipped Upper Femoral Epiphysis (Adolescent Coxa Vara), 361
 Incidence and Etiology, 361
 Pathogenesis and Pathology, 362
 Clinical Features and Diagnosis, 362
 Treatment, 363

Tibia Vara (Blount's Disease), 364

Madelung's Deformity, 365

Scoliosis, 365

Etiological Classification of Scoliosis, 366

Idiopathic Scoliosis, 368

Spondylolysis, 372

Incidence and Etiology, 373
 Clinical Features and Treatment, 373
 Complication, 373

Spondylolisthesis, 373

Incidence and Etiology, 373
 Clinical Features and Diagnosis, 374
 Treatment, 375
 Complications, 375

14 Neoplasms of Musculoskeletal Tissues, 379

Neoplasm-Like Lesions and True Neoplasms of Bone, 379

Definition of Terms, 379

Classifications, 379**General Considerations, 380**

Incidence, 380

Diagnosis, 381

Clinical Features, 381

Diagnostic Imaging and Correlation with Pathology, 381

Laboratory Investigations, 388

Staging of Benign, Potentially Malignant, and Malignant Neoplasms of Bone, 389

Biopsy, 389

Principles and Methods of Treatment, 390

Principles, 390

Methods of Treatment, 391

Specific Neoplasm-Like Lesions of Bone, 392

Osteoma (Ivory Exostosis), 392

Single Osteochondroma (Osteocartilaginous Exostosis), 392

Multiple Osteochondromata (Multiple Hereditary Exostoses) (Diaphyseal Aclasis), 393

Osteoid Osteoma, 393

Osteoblastoma (Giant Osteoid Osteoma), 395

Single Enchondroma, 395

Multiple Enchondromata (Ollier's Dyschondroplasia), 395

Subperiosteal Cortical Defect (Metaphyseal Fibrous Defect), 396

Nonosteogenic Fibroma (Nonossifying Fibroma), 396

Monostotic Fibrous Dysplasia, 396

Polyostotic Fibrous Dysplasia, 397

Osteofibrous Dysplasia (Campanacci Syndrome), 397

"Brown Tumor" (Hyperparathyroidism), 397

Angioma of Bone, 397

Aneurysmal Bone Cyst, 398

Simple Bone Cyst (Solitary Bone Cyst; Unicameral Bone Cyst), 398

Specific True Neoplasms of Bone, 400

Osteosarcoma (Osteogenic Sarcoma), 400

Surface Osteosarcoma, 402

Parosteal Osteosarcoma, 402

Periosteal Osteosarcoma, 403

Benign Chondroblastoma, 403

Chondromyxoid Fibroma, 403

Chondrosarcoma, 404

Fibrosarcoma, 404

Malignant Fibrous Histiocytoma, 404

Myeloma (Multiple Myeloma), 404

Ewing's Tumor (Ewing's Sarcoma), 405

Hodgkin's Lymphoma, 407

Non-Hodgkin's Lymphoma (Reticulum Cell Sarcoma), 407

Skeletal Reticuloses (Langerhans' Cell Histiocytosis), 407

Leukemia, 408

Giant Cell Tumor of Bone (Osteoclastoma), 408

Metastatic (Secondary) Neoplasms in Bone, 409

Metastatic Carcinoma, 409

Metastatic Neuroblastoma, 411

Neoplasm-Like Lesions and True Neoplasms of Soft Tissues, 411**Classifications, 411****Specific Neoplasm-Like and Benign Neoplasms of Soft Tissues, 412**

Lipoma, 412

- Fibroma, 412
- Aggressive Fibromatosis, 412
- Neuroma, 412
- Neurilemmoma (Benign Schwannoma), 412
- Neurofibroma, 412
- Hemangioma, 412
- Glomus Tumor, 412
- Synovial Chondrometaplasia (Synovial Chondromatosis), 412
- Pigmented Villonodular Synovitis, 413
- Giant Cell Tumor of Tendon Sheath, 413
- Specific Malignant Neoplasms of Soft Tissues, 413**
 - Rhabdomyosarcoma, 414
 - Liposarcoma, 414
 - Fibrosarcoma and Malignant Fibrous Histiocytoma, 414
 - Neurosarcoma, 414
 - Synovial Sarcoma (Synovioma), 414
 - Epithelioid Sarcoma, 414

Section III Musculoskeletal Injuries

15 Fractures and Joint Injuries--General Features, 417

- General Incidence and Significance, 417
- Fractures and Associated Injuries, 418
 - Physical Factors in the Production of Fractures, 418
 - Descriptive Terms Pertaining to Fractures, 419
 - Associated Injury to the Periosteum, 422
 - Diagnosis of Fractures and Associated Injuries, 423
- Patient's History, 423
- Physical Examination, 424
- Diagnostic Imaging, 425
 - Normal Healing of Fractures, 425
- Healing of a Fracture in Cortical Bone (Diaphyseal Bone; Tubular Bone), 427
 - Initial Effects of the Fracture, 427
 - Early Stages of Healing from Soft Tissues, 427
 - Stage of Clinical Union, 428
 - Stage of Consolidation (Radiographic Union), 428
- Healing of a Fracture in Cortical Bone with Rigid Internal Fixation, 428
- Healing of a Fracture in Cancellous Bone (Metaphyseal Bone and Cuboidal Bones), 430
- Healing of a Fracture in Articular Cartilage, 431
- Healing of a Fracture Involving the Epiphyseal Plate (The Physis), 433
- Time Required for Uncomplicated Fracture Healing, 433
 - Age of the Patient, 433
 - Site and Configuration of the Fracture, 433
 - Initial Displacement of the Fracture, 433
- Blood Supply to the Fragments, 433
- Assessment of Fracture Healing in Patients, 434
 - Abnormal Healing of Fractures, 434
 - Complications of Fractures, 434
- Classification of the Complications of the Original Injury, 435**
 - General Principles of Fracture Treatment, 436
 1. First, Do No Harm, 436
 2. Base Treatment on an Accurate Diagnosis and Prognosis, 436
 3. Select Treatment with Specific Aims, 437

4. Cooperate with the "Laws of Nature", 437
5. Make Treatment Realistic and Practical, 437
6. Select Treatment for Your Patient as an Individual, 438

Emergency Life Support Systems, 438**Preliminary Care For Patients with Fractures, 438**

Immediate Care Outside a Hospital (First Aid), 439

Transportation, 441

Emergency Care in a Hospital, 441

Responsibilities for the Care of the Critically Injured, 444**Fractures and Dislocations, 444****Specific Methods of Definitive Fracture Treatment, 445**

Specific Methods of Treatment for Closed Fractures, 446

Treatment for Open Fractures, 460

Anesthesia for Patients with Fractures, 462**After-Care and Rehabilitation for Patients with Fractures, 463****Complications of Fracture Treatment, 464**

Classification of Complications of Fracture Treatment, 464

Recognition and Treatment of Complications, from Both the Initial Injury and Its Treatment, 464

Initial and Early Complications, 465

Late Complications, 476

Special Types of Fractures, 485**Stress Fractures (Fatigue Fractures), 485****Pathological Fractures, 486**

Classification of Disorders That Predispose Bone to Pathological Fracture, 486

Clinical Features and Diagnosis, 487

Prognosis of Pathological Fractures, 487

Dislocations and Associated Injuries, 488**Normal Joint Stability, 488****Physical Factors in the Production of Joint Injuries, 489****Descriptive Terms Pertaining to Joint Injuries, 489****Associated Injury to the Fibrous Capsule, 490****Diagnosis of Joint Injuries, 491****Normal Healing of Ligaments, 492****Complications of Dislocations and Associated Injuries, 492****General Principles of Treatment for Joint Injuries, 492****Specific Types of Joint Injuries, 492**

Contusion, 492

Ligamentous Sprain, 492

Dislocations and Subluxations, 493

Muscle Injuries, 493**Tendon Injuries, 494**

Closed Tendon Injuries, 494

Open Tendon Injuries, 494

16 Specific Fractures and Joint Injuries in Children, 499**Special Features of Fractures and Dislocations in Children, 499**

1. Fractures More Common, 499

2. Stronger and More Active Periosteum, 499

3. More Rapid Fracture Healing, 499

4. Special Problems of Diagnosis, 500

5. Spontaneous Correction of Certain Residual Deformities, 500

Angulation, 501

Incomplete Apposition, 502

Shortening, 502

Rotation, 502

6. Differences in Complications,	502
7. Different Emphasis on Methods of Treatment,	503
8. Torn Ligaments and Dislocations Less Common,	503
9. Less Tolerance of Major Blood Loss,	503

Fractures That Involve the Epiphyseal Plate (Physis),	504
Anatomy, Histology, and Physiology,	504
Diagnosis of Epiphyseal Plate Injuries,	505
Salter-Harris Classification of Epiphyseal Plate Injuries,	505
Healing of Epiphyseal Plate Injuries,	508
Prognosis Concerning Growth Disturbance,	508
Possible Effects of Growth Disturbance,	508
Special Considerations in the Treatment of Epiphyseal Plate Injuries,	510
Avulsion of Traction Epiphyses,	510
Birth Fractures,	511
Specific Birth Fractures,	511
Specific Fractures and Dislocations,	512
The Hand,	512
The Wrist and Forearm,	513
Distal Radial Epiphysis,	514
Distal Third of Radius and Ulna,	514
Middle Third of Radius and Ulna,	516
Proximal Third of Radius and Ulna,	517
The Elbow and Arm,	518
Pulled Elbow,	520
Proximal Radial Epiphysis,	521
Dislocation of the Elbow,	522
Medial Epicondyle,	523
Lateral Condyle,	523
Supracondylar Fracture of the Humerus,	526
Shaft of the Humerus,	531
The Shoulder,	531
Proximal Humeral Epiphysis,	531
Clavicle,	532
The Spine,	533
Cervical Spine,	535
Thoracic Spine,	536
Lumbar Spine,	537
The Foot,	537
Fractures of the Metatarsals,	537
The Ankle and Leg,	538
Type I Injury of the Distal Fibular Epiphysis,	539
Type II Injury of the Distal Tibial Epiphysis,	539
Type III Injury of the Distal Tibial Epiphysis,	539
Type IV Injury of the Distal Tibial Epiphysis,	539
Type V Injury of the Distal Tibial Epiphysis,	540
Fracture of the Tibia,	540
The Knee and Thigh,	542
Avulsion Fracture of the Anterior Tibial Spine,	542
Type II Injury of the Proximal Tibial Epiphysis,	543
Type II Injury of the Distal Femoral Epiphysis,	543
Type IV Injury of the Distal Femoral Epiphysis,	543
Traumatic Dislocation of the Patella,	543
Internal Derangements of the Knee,	545
Fractures of the Femoral Shaft,	545
Fractures of the Subtrochanteric Region of the Femur,	549

The Hip and Pelvis, 549

- Fractures of the Femoral Neck, 549
- Type I Injury of the Proximal Femoral Epiphysis, 551
- Traumatic Dislocation of the Hip, 551

Pelvis, 555

- Stable Fractures of the Pelvis, 555
- Unstable Fractures of the Pelvis, 555

Child Abuse, 556

- Diagnosis, 556
- Treatment, 558

17 Specific Fractures and Joint Injuries in Adults, 561**Special Features of Fractures and Dislocations in Adults, 561**

1. Fractures Less Common But More Serious, 561
2. Weaker and Less Active Periosteum, 561
3. Less Rapid Fracture Healing, 561
4. Fewer Problems of Diagnosis, 562
5. No Spontaneous Correction of Residual Fracture Deformities, 562
6. Differences in Complications, 562
7. Different Emphasis on Methods of Treatment, 562
8. Torn Ligaments and Dislocations More Common, 563
9. Better Tolerance of Major Blood Loss, 563

Specific Fractures and Dislocations, 563**The Hand, 563**

- General Features, 563
- Phalanges, 563
- Sprains and Dislocations of the Interphalangeal Joints, 565
- Dislocation of the Metacarpophalangeal Joints, 565
- Metacarpals, 566
- Fracture-Dislocation of the First Carpometacarpal Joint (Bennett's Fracture), 567
- Fractures of the Scaphoid, 567
- Dislocation of the Lunate, 570

The Wrist and Forearm, 570

- Distal End of the Radius (Colles' Fracture), 570
- Smith's Fracture of the Distal End of the Radius, 573
- Fractures of the Shafts of the Radius and Ulna, 574

The Elbow and Arm, 579

- Fracture of the Olecranon, 579
- Fractures of the Radial Head, 581
- Posterior Dislocation of the Elbow, 582
- Fracture-Dislocations of the Elbow, 584
- Intercondylar Fractures of the Humerus, 584
- Fractures of the Shaft of the Humerus, 584
- Fractures of the Neck of the Humerus, 588
- Fractures of the Greater Tuberosity of the Humerus, 589

The Shoulder, 589

- Dislocations of the Shoulder, 589
- Rupture of the Musculotendinous Cuff of the Shoulder, 593
- Subluxation and Dislocation of the Acromioclavicular Joint, 593
- Dislocation of the Sternoclavicular Joint, 594
- Fractures of the Clavicle, 594

The Spine, 595

- General Features, 595
- Injuries of the Cervical Spine, 596
- Injuries of the Thoracic and Lumbar Spine, 602

- Thorax, 605
 - Fractures of the Ribs, 605
- The Foot, 605
 - Fractures of the Metatarsals, 605
 - Lisfranc's Fracture-Dislocations of the Tarsometatarsal Joints, 605
 - Fractures of the Os Calcis (Calcaneum), 606
 - Fractures of the Neck of the Talus, 608
- The Ankle, 609
 - Sprains of the Lateral Ligament, 609
 - Tears of the Lateral Ligament, 610
 - Total Rupture of the Achilles Tendon, 610
 - Fractures and Fracture-Dislocations of the Ankle, 611
- The Leg, 616
 - Fractures of the Shafts of the Tibia and Fibula, 616
- The Knee, 620
 - Fractures of the Proximal End of the Tibia (Tibial Plateau Fractures), 620
 - Injuries of the Semilunar Cartilages (Menisci), 622
 - Ligamentous Injuries of the Knee, 625
 - Traumatic Dislocation of the Knee, 627
 - Fractures of the Patella, 628
 - Intercondylar Fractures of the Femur, 629
- The Thigh, 630
 - Fractures of the Femoral Shaft, 630
- The Hip, 632
 - Intertrochanteric Fractures of the Femur, 632
 - Fractures of the Femoral Neck, 634
 - Traumatic Dislocations and Fracture-Dislocations of the Hip, 638
- The Pelvis, 642
 - Fractures of the Pelvis, 642
 - Treatment of Pelvic Fractures, 643
- The Care of Athletes, 647
 - The Etiology of Athletic Injuries and Their Prevention, 648
 - Terminology of Athletic Injuries, 649
 - The Athlete's Response to Injury, 650
 - Aims of Treatment of Athletic Injuries, 650
 - Medical Aspects of Athletic Conditioning and Training, 650
- The Care of the Elderly and their Fractures, 651
 - The Response of the Elderly to Injury, 651
 - Aims of Treatment for the Elderly, 651
 - The Treatment of Fractures in the Elderly, 652
 - The Prevention of Fractures in the Elderly, 652

Section IV Research

- 18 The Philosophy and Nature of Medical Research with One Example, 657**
 - A Definition of Research, 657
 - The Various Types of Research, 658
 - The Image of Medical Research, 658
 - The Goals and Importance of Research, 658
 - The Motivation for Search and Research, 659
 - Personal Qualities of the Medical Scientist, 659
 - The Philosophy of Medical Research, 659
 - The Nature of Medical Research—A Cycle, 660
 - 1. Recognize an Unsolved Clinical Problem, 660
 - 2. Think, 660

3. Review the Scientific Literature, 660
 4. Ask an Intelligent Question, 662
 5. Formulate a Hypothesis, 662
 6. Plan the Research Protocol, 662
 7. Seek Collaboration, 662
 8. Apply for Funding, 662
 9. Conduct the Investigation, 663
 10. Collect and Analyze the Data, 663
 11. Interpret the Data, 663
 12. Draw Valid Conclusions, 663
 13. Answer the Original Question, 663
 14. Present Results at a Meeting, 664
 15. Publish a Scientific Paper, 664
 16. Apply the New Knowledge, 664
- One Example of Medical Research, 664**
- An Overview of Continuous Passive Motion (CPM), 664

Index, 673
