Production of enzymes for environmental applications- A review- <i>Keisuke Ikehata, Ian D. Buchanan and Daniel W. Smith</i>	1
Applications of oxidative enzymes in wastewater treatment <i>Nelson Durán</i>	41
Removal of phenolic compounds using microbial peroxidase <i>Akihiko Sakurai, Mina Masuda and Mikio Sakakibara</i>	53
Enzymatic treatment of lignin-containing effluents <i>Anderson Guerra and André Ferraz</i>	73
Peroxidase-catalyzed oxidation of phenols in industrial wastewaters <i>Jim A. Nicell and Monika Wagner</i>	93
Treatment of phenolic endocrine-disrupting chemicals by lignin-degrading enzymes <i>Takaaki Tanaka and Masayuki Taniguchi</i>	125
Treatment of endocrine disruptors in wastewater by using a white-rot fungal laccase immobilized into dialysis tubing <i>Kazuhiro Hoshino, Hiroshi Yamazaki and Shigehiro Kagaya</i>	149
